

SENATOR CUDABACK: ...diseases and so on that are going on, around the country we all know...I won't allude to any of them specifically, but we know what can happen if we're not careful with our cleanliness and so on. This will take care of that. I would like you to support the bill. Thank you.

PRESIDENT ROBAK: Thank you, Senator Cudaback. The Chair recognizes Senator Chambers.

SENATOR CHAMBERS: Madam President, members of the Legislature, I'd like to ask Senator Cudaback a question or two.

PRESIDENT ROBAK: Senator Cudaback.

SENATOR CUDABACK: Yes.

SENATOR CHAMBERS: Senator Cudaback, you had said at one point when you were talking the bill goes on, I thought you were going to say, and on and on and on and on. But here's the question I want to ask you, because if you hadn't gone on and on so much, I wouldn't have even paid attention. Did I hear you say that a person could be 17 years old and do this?

SENATOR CUDABACK: Yes, that is in the bill.

SENATOR CHAMBERS: Well, if one so young can master this, why is it necessary that we have a licensure law?

SENATOR CUDABACK: I guess we feel that a person that's 17 years old has some common sense to the person, and I think he's adequately trained, and if he's adequately trained can master this.

SENATOR CHAMBERS: Fair enough answer. What exactly does the person who's going to perform this function do?

SENATOR CUDABACK: Well, he puts this machine into the follicle of the hair and it simply burns it...the root up or whatever it does to the base of the hair so it does not come back and make us grow whiskers. I won't allude to any person, but...

SENATOR CHAMBERS: Should this be an electrolysis bill or a torturers' bill? (Laughter.)

SENATOR CUDABACK: Well, call it what you will.
