

February 8, 1995 LB 202

PRESIDENT ROBAK: Time.

SENATOR BERNARD-STEVENS: ...more dollars in so that we could get it out into that area. That's the main reason for mine coming today.

SENATOR BEUTLER: Thank you.

PRESIDENT ROBAK: Thank you, Senator. Senator Bohlke. Senator Bohlke.

SENATOR BOHLKE: Madam President, members, sorry. I was earlier listening to Senator Chambers. And on this issue I feel very strongly that we need to do something, but I also agree with Senator Chambers that I'm not sure that...no, stronger than that. I also do not believe that everyone that's applying for a marriage license should have to fund this particular category. I have...my daughter-in-law, as a matter of fact, works in a shelter in Indiana. And I was visiting with her, and I told Senator Bernard-Stevens, in Indiana what they do is they have a special license plate that people may purchase if they want to fund this particular category. It sets up a children's trust fund. And it is a way of channeling money to the homes that provide the shelter for women and children. She's sending me a picture of that license plate. I know that sometimes that gets to be a complicated issue, but we do have a bill this session that allows nonfor-profit organizations to at least apply a sticker. and I think that's something in the future that I would look to. And what I'm saying is that certainly I think it should be something that we try to fund, but I do not think that we should assume that everyone applying for a marriage license should have to fund that, and that it should be something that people may donate to if they wish to support. Thank you. Therefore I oppose the Senator Bernard-Stevens amendment.

PRESIDENT ROBAK: Thank you, Senator. Senator Chambers.

SENATOR CHAMBERS: Madam President, members of the Legislature, and I hope some of the conservatives are paying attention. I don't know who you are, really, I don't know what a conservative is. I don't know what a liberal is, but those who are apparently know what they are. Just like I think a chameleon recognizes another chameleon, but I don't know if they are called chameleons. So you all recognize each other. I don't know if you have a hand signal. I don't know if there's a
