

discussed in the context of doing anything practical and concrete to help those people who need it. When we talk about Christian compassion, Christian fundamentalism, the attitude and ideas and principles of Jesus, they are always discussed in a vacuum, but by God, the god of this world which is money and, Senator Matzke, the reason they put "In God We Trust" on the dollar because the dollar is the god in which America trusts. Everything can screech to a halt and we'll modify laws to help these big shots to make it easier for them to get the energy which they can afford to pay for, but again Jesus took care of that. He said, to him that hath, shall be given; from him that hath not, shall be taken even that which he seemeth to have, which is, his way of saying, the rich get richer and the poor get poorer and the reason he said, the poor you'll have with you always, is because legislatures and others do all they can to keep the poor eternally poor. Abraham Lincoln said God must have really loved the poor man because he made so many of them. He must have loved roaches even more, but the fact is when we have the opportunity to do something concrete and beneficial, it's only in response to the Chamber of Commerce or some big shot, money-making private enterprise operation which based on the intent language in these bills cannot solve these problems. So we've got to give them welfare, give it to them not in thousands of dollars, not in hundreds of thousands of dollars, but the equivalent of millions of dollars. The Governor is behind this. At the same time he says cut off assistance for this group or that group which may be disabled, unable to function in this society, but he's willing to say private enterprise, which is supposed to be the savior of this country, cannot solve these problems based on its ordinary operations, so give them all of this money. But when it comes to actual human beings who are disabled, don't give them anything, cut them off at the pass. Well here's where he and others are smart. If you don't provide food, if you don't provide medical care, if you don't provide heat, they'll die. All these poor, old people will die. They cease to be a burden. You don't have to worry about them for social security. You can stop hearing people like me and Senator Wesely talk about doing something to try to help them in their miserable condition. If we don't feed the children, they will die.

SENATOR CROSBY: One minute.

SENATOR CHAMBERS: And they will die quickly. And those who are so worried about a fetus in the womb, but have no concern about
