

be on a screen and this person would dip the screen into this solution raise it and shake it gently and shake it gently until all the fluid not only drained out of the screen but so that it would drain out of the holes in the little tiny washers and that's all that person did. Well naturally they wouldn't make as much as an engineer, but since this is one of those types of companies which was a good citizen, that person made a decent wage. What Senator Wesely is offering is very modest. They are giving a figure of \$1.3 billion being involved with this company coming here so this is not going to be a disincentive for them and they might even tell us that this is an additional break...

SENATOR LINDSAY: Time.

SENATOR CHAMBERS: ...because they would go beyond it.

SENATOR LINDSAY: Thank you, Senator Chambers. Senator Hall.

SENATOR HALL: Thank you, Mr. President and members. Senator Wesely, would you respond to a question?

SENATOR LINDSAY: Senator Wesely.

SENATOR WESELY: Yes.

SENATOR HALL: You...because I rise in support of the amendment I believe and you mentioned and the amendment reads that it would be \$11 an hour including health care and other benefits.

SENATOR WESELY: Right.

SENATOR HALL: And you referenced the work that the...I think it was the welfare reform task group...

SENATOR WESELY: Right.

SENATOR HALL: ...did in this area.

SENATOR WESELY: Umm, hmm.

SENATOR HALL: And the \$11 figure became the figure when you coupled it with these other provisions, health care and other benefits.

SENATOR WESELY: Right.
