

states adopting the call?

SENATOR KRISTENSEN: Well, obviously, I don't know what the exact...

SPEAKER WITHEM: One minute.

SENATOR KRISTENSEN: ...answer to that is but I think you may place that in jeopardy.

SENATOR SCHIMEK: Okay, I just...thank you, Senator Kristensen. I just wanted to have a chance to get that on the record and get some idea of how that would affect our delegation and perhaps our participating in that call and you know you can do what you want to substantively about these, but I think you should be aware that it may affect the process itself. So with that I thank you very much.

SPEAKER WITHEM: Thank you, Senator Schimek. Senator Witek.

SENATOR WITEK: Mr. Speaker, members of the body, I have talked to Senator Chambers who has offered a change to my amendment, so I would ask unanimous consent to pull my amendment and offer instead an amendment by Senator Chambers that only changes my amendment to read, the action plan shall not include any, and then you cross out "proposed changes to", and in place of that language put in, "proposals to amend the Constitution of the United States", and then again in the second portion of my amendment strike out "proposed changes to" on line 5 and put in "proposals to amend the Constitution of the United States". It's much clearer on the language as to what I'm trying to get to. I'm not trying to stop people from proposing changes. What I'm trying to do is stopping them from bringing back a document that has changes in the form of amendments to the Constitution of the United States. I don't want them to amend the Constitution of the United States in this action plan or in this petition. So this language is much clearer and if the body would allow me to do so, I would like to pull my amendment and put in Senator Chambers' changed amendment.

SPEAKER WITHEM: The request is to substitute, is there an objection? There is an objection. The substitution is not allowed. But the amendment is still then, Mr. Clerk, my interpretation the amendment is still before us?
