

SENATOR HALL: Thank you, Senator Robinson, thank you, Senator Withem. Senator Jones. your light is next.

SENATOR JONES: Mr. Chairman and members of the body, the question that Senator Bernard-Stevens asked, I'd like to go a little bit farther on it to let Senator Bohlke explain it just a little bit more, just how many dollars we're talking about per year and per biennium, so maybe I could get her to explain that just a little farther.

SENATOR HALL: Senator Bohlke.

SENATOR BOHLKE: Two point nine million per school year, so that would be 5.8 per biennium.

SENATOR JONES: Okay. And how long would that go then?

SENATOR BOHLKE: The 2.9 is each year it goes on.

SENATOR JONES: It goes on until we sunset it.

SENATOR BOHLKE: If we sunset it.

SENATOR JONES: If we sunset it.

SENATOR BOHLKE: If we add a sunset on, then it would end at that sunset year and that's what Senator Bernard-Stevens was saying.

SENATOR JONES: Okay.

SENATOR BOHLKE: I think that was one of his concerns.

SENATOR JONES: I can understand where he's coming from now, but I do want to not shut it off too quick because of the time that they might decide. You might have to talk this up in a community a little while, maybe a year or two before they say, well let's do it. So then we want to get down the line a little farther so I think we've got five years there. So that's the point I want to bring out, so if I've got any time left I'll let Senator Bernard-Stevens have it.

SENATOR HALL: Senator Bernard-Stevens, you have approximately three and a half minutes.
