

April 4, 1995

LR 85, 86

to all of you, but if you would like to see and have not, I'd be glad to have you see it. So, thank you for your support of the resolution. We do have people from the English Department and other departments this morning with us to show their support and to ask for your support of this seminar. Thank you.

SPEAKER WITHEM: Senator Schrock.

SENATOR SCHROCK: Mr. Speaker, members of the Legislature, I, too, would like to commend the English Department of the University of Nebraska for organizing this seminar. Of course, most of you know that Red Cloud is in my district, and it is interesting, when Willa Cather wrote about Red Cloud, she referred to Red Cloud as Black Hawk, and, of course, My Antonia was on television three times this past week. If you missed it, you have one more chance and that would be this Saturday at two o'clock on the USA channel. But my congratulations to the English Department and I hope that I have a chance to participate in part of that and hopefully you can too.

SPEAKER WITHEM: Thank you, Senator Schrock. You have heard the introduction on LR 85. LR 86.

CLERK: Mr. President, LR 86 was offered by Senator Brown, found on page 1402 of the Journal.

SPEAKER WITHEM: Senator Brown.

SENATOR BROWN: Mr. Speaker, members of the Legislature, it is my pleasure to introduce this resolution on behalf of Dr. Melvin Jenkins, who was Vice Chairman of the Pediatrics Clinic at the University of Nebraska Medical Center from 1971 to 1973. He founded the Pediatric Endocrine Clinic. There is information about his leadership nationally at your desks. He went on from the University of Nebraska Medical Center to Howard University, where he has served very admirably, and Howard University is now going to endow a lectureship in his honor, and would like us to participate in this honor for Dr. Jenkins, and I would just urge the adoption of the resolution. And for Senator Chambers, I would like him to know that even though we are not naming anything in his honor, he is still alive and is very much appreciative of everyone's interest in his work.

SPEAKER WITHEM: Senator Brown, you think Senator Chambers is still alive, is that the point you were making?
