

program car, what is that? Because I really don't know.

SENATOR SCHELLPEPER: I have never had a program car but I think it's somebody that has been...formerly some corporation had and drove and...

SENATOR CHAMBERS: Senator Dierks, is gesturing and looking right at me.

SENATOR SCHELLPEPER: Senator Dierks probably has one.

SENATOR CHAMBERS: Senator Dierks, would you tell us what a program car is?

PRESIDENT ROBAK: Senator.

SENATOR DIERKS: I will try, Senator Chambers. I think that I have what is commonly considered a program car. It's a car that was put out into...it's a program that the companies have that put these cars out into car rental agencies and they're used for a certain number of miles and they come back in and are sold as program cars. I'm not sure...it may not only deal with car rental agencies, it may be cars that are put out to companies and used for a certain length of time and brought back after they've had certain number of miles on.

SENATOR CHAMBERS: Well, when the company gets the car what...do they get it on a deal from the dealer? There's something the company must gain or they wouldn't do this.

PRESIDENT ROBAK: One minute.

SENATOR DIERKS: Well, I think what they gain is the opportunity to drive new vehicles and I'm not sure what the...what the deal is but these cars come to auctions and they're sold at automobile auctions, like the one over in Omaha.

SENATOR CHAMBERS: But the company would not pay the sales tax under this arrangement. Is that what happens?

SENATOR DIERKS: I wouldn't know about that.

SENATOR CHAMBERS: Senator Schellpeper, do you know?

PRESIDENT ROBAK: Senator Schellpeper.
