

amendment. I take the language that's found in Section 9 that is really all of it, I believe, encompassed in subsection (1). When we talk about adopting and promulgating rules and regulations for its organization and internal management and rules and regulations governing the exercising or exercise of its powers and the fulfillment of its purpose, I believe in that subsection (1) we incorporate everything that is spelled out in subsections (2) through (8). At the same time, we don't require them which is a tremendous distinction because the difference is, is that the way the proposal currently reads we have subsections (2) through (8) that are mandatory on the part of the commission. It says that the commission shall appoint and abolish such advisory commissions as may be necessary for the performance of its functions and delegate appropriate powers and duties to them. So, in other words, we're going to have them, if they feel necessary, appoint boards and commissions and allow for that commission to then allow those boards and commissions or advisory committee, rather, to have appropriate powers and duties as they deem appropriate. So, in other words, we're giving them the power and the authority to transfer their own power and authority to another advisory committee. Subsection (3) says we're going to plan improvements in the indigent defense systems and promote their implementation. We're requiring that they do that. We're requiring that they make or encourage studies of any aspect of indigent defense systems, any aspect of indigent defense systems, requiring that they accept and administer loans, grants and donations from the United States and its agencies, the State of Nebraska and its agencies and other sources, public and private, for carrying out the functions of the commission. Why is that not incorporated in the previous subsection (1)? I believe it is. We're requiring that they enter into contracts, leases and agreements necessary, convenient or desirable for carrying out its purposes and the powers granted under this section with agencies of the state or local government, corporations or persons. So they have the ability to contract, lease or whatever for purposes of entering into agreements that are necessary, convenient or desirable with agencies of state government, local governments, corporations or persons. And if they've got the ability in subsection (1) to promulgate rules and regs for its organization and internal management and rules and regs to exercise its powers in the fulfillment of its purpose, they've got that authority. We don't have to mandate because we say they shall acquire and hold and dispose of personal property in the exercise of its powers. We don't, I guess, allow for them to
