

CLERK: (Roll call vote taken. See page 1898 of the Legislative Journal.) 36 ayes, 3 nays on the amendment.

SENATOR BERNARD-STEVENS: The amendment is agreed to. Senator Maurstad, you're recognized.

SENATOR MAURSTAD: We're on the bill, right? Thank you, Senator Bernard-Stevens. I wanted to....

SENATOR BERNARD-STEVENS: Senator Maurstad, if you'd go ahead and make the motion first, and then we'll go...then we'll open that up. That's what I recognized you for. I'm sorry.

SENATOR MAURSTAD: You're not going to turn my light off, are you? Oh, that's good. In that case, I'll move to advance LB 860 to E & R for engrossment.

SENATOR BERNARD-STEVENS: That is a debatable motion. The call is raised. Senator Robinson, you're recognized first, followed by Senator Maurstad. Senator Robinson waives off. Senator Maurstad.

SENATOR MAURSTAD: Thank you, Mr. President. I just wanted to raise a similar concern that I brought up on General File relative to Internet and looking at it from...or technology, telecommunications and looking at it from a perspective of funding it through our educational system. And I still believe that a better process would be to look at this more globally, more community wide because there are certainly many aspects of our communities that need to tap in on technology as we move forward. I'm not going to take a lot of time, wanted to express that concern again that I think we're being too narrow in our approach, and I would be more supportive of a more general application of information technology within all segments of our individual communities. Thank you.

SENATOR BERNARD-STEVENS: Thank you, Senator Maurstad. There being no other lights, the motion has been made for the advancement of LB 860 to E & R. All those in favor say aye. Opposed. It appears the ayes have it. The ayes do have it, the bill is advanced. Mr. Clerk, items for the record? We move to the next bill on the list, which would be LB 840.

CLERK: Mr. President, 840, Senator, I have E & R amendments
