

at what I think Senator Chambers is doing it does say that wild mammals shall mean, and then it excludes human beings, so it doesn't appear that there should even be the connection that would be drawn and I agree then that there shouldn't be the human beings in statute. However, at times when I hear Senator Chambers talk I'm not sure if what he's doing really goes along with some of his beliefs because human beings, in this case, is put in the same category as the Norway rat and the black rat and that there perhaps are some human beings that might be in the category of rats and at times I've heard some of those things mentioned by people. So, as I understand it, I stand in support of the amendment and would ask for others to do likewise. Thank you.
