

would tend to run toward the house. This man that I worked for was hired to correct that. So I spent many, many hours in the hot sun running a jackhammer and it was especially difficult because my job was not just to break all the way through the concrete but to sheer off a certain amount of it so that they could then lay another layer on top and correct the inappropriate slope. Ordinarily, I won't even accept a drink of water from anybody. Mrs. Chernlack saw me out there laboring in that hot sun and she invited me in, gave me some lemonade, let me enjoy the coolness of the air conditioning. She made my job much easier. That was an act of kindness which I have never forgotten. I had no idea, naturally, when that was occurring that this particular type of occasion would arise. But since it might seem so seldom that I will stand on the floor to say kind words about somebody who has shown me a kindness, I thought this was the ideal opportunity to do so and, therefore, I wanted it in the record and, naturally, I will support this resolution.

PRESIDENT ROBAK: Thank you, Senator Chambers. Is there any further discussion on the resolution? Seeing none, Senator Brown, to close.

SENATOR BROWN: I just appreciate the words from all the people who have supported this and especially the words of Senator Chambers because he...he told you exactly what Helen was like as a person in his story, and I would just now move that we adopt this resolution. Thank you very much.

PRESIDENT ROBAK: Thank you, Senator Brown. The question before the body is the adoption of LR 110. All those in favor vote aye; all those opposed vote nay. Have you all voted? Please record.

ASSISTANT CLERK: 25 ayes, 0 nays to adopt the resolution.

PRESIDENT ROBAK: LR 110 is adopted. LR 218.

ASSISTANT CLERK: LR 218 was introduced by Senator Schrock, Wickersham, Beutler and Bromm and it's found in the Journal on page 2284.

PRESIDENT ROBAK: The Chair recognizes Senator Elmer.

SENATOR ELMER: Thank you, Madam President. This is a resolution that's more substantive in nature than many of them
