

SPEAKER WITHEM: Thank you, Senator Warner. The motion before the body now...let me just make a quick procedural announcement here. People have been asking, including Senator Day, I think I'm going to change my mind on what I told you before. We are on LB 613. There's potential that we may move that bill a little quicker than we thought. I don't want to put too much pressure on people to either do that or not do that. Obviously, if there is a lot of debate on it, we'll continue on it as long as it needs it. But if we conclude LB 613 with a reasonable amount of time left in the afternoon, my intentions would be to move on to LB 519 and to LB 283 and not to go back to LB 592 because LB 592 I think there are considerable number of amendments on it and we would be unlikely to get that bill completed today, so that would be the intention. Mr. Clerk. Mr. Clerk, next amendment.

CLERK: Mr. President, the next amendment I have to the bill is by Senator Jones. Senator, AM2431.

SPEAKER WITHEM: Senator Jones, on your amendment.

SENATOR JONES: Yes, Mr. Speaker and members of the body, my amendment is similar to Warner's. It don't go into detail like his, but mine is putting a 4 percent lid per year for the two years and it's starting in the same time period, and if you've got the copy of the amendment, well, it says 8.2; well, that's because it's compounded to the two years and it's going to be the same problem probably as Jerry Warner's, but I just wanted to make a point that it's hard for me to go back to my local district and tell them we're going to put a lid on subdivisions, and if we're not going to do something at the state that...so that's kind of intrigued me to do this but I just wanted to bring this to you, and in the opening here, I'd like to give a little time to Jim Jensen because he was the one that signed on it too with me. Thank you.

SPEAKER WITHEM: Senator Jensen.

SENATOR JENSEN: Yes, thank you. Mr. Speaker, members of the body, I did sign onto this bill with Senator Jones and not knowing that Senator Warner had already introduced a similar bill, and there's no question about it, those of us who go back to our districts and hear from the people and they want some tax considerations. And this last weekend when I was back I did hear that we had put some limitations on counties and school
