

I voted in opposition to overrule the Chair because I guess I get a little tired of trying to second guess everybody, what they...what they really mean. And I understood when Senator Witek...or when Senator Withem asked...(laughter), everybody else said that but that's the first time I've done it, when Senator Withem asked us to go ahead and suspend any motions to amend or anything else that what his purpose was was to look at these bills and have...at least he allowed us to debate the bill itself and then not to try to prolong debate on that and to have an up or down vote. And I believe he even said that when he discussed it. So, understanding that that's what his purpose was and realizing that maybe he did in his humanness make a mistake, I felt that that should be supported, that any of us in that position may have made that same mistake. And I understand you're talking about the rules, but we're also talking about a process that involves people and that's where I made the difference. But, since you have decided to allow discussion on the bracket motion, therefore, asking for a vote on the bracket motion, and since...since I would like to see this bill at least straightened up before we actually pass it, and since assuming...I guess I have to ask a question, Senator Chambers, or even Senator Withem, someone who would know more. When you make this motion to bracket does it...and since you don't make it to a time certain, when does it come up again? When will the bill come up again?

PRESIDENT ROBAK: Senator Chambers.

SENATOR CHAMBERS: Senator Witek, then the bill would be in that posture for the Speaker to agendize it in the way that he chose. And I'm...and...

SENATOR WITEK: So when we come back in January he could put this bill back on the agenda at any time?

SENATOR CHAMBERS: Well, if you like the bill, I don't know whether he would since you gave him your last name and he's Senator Witek, so does this mean you and I have...

SENATOR WITEK: I did apologize.

SENATOR CHAMBERS: ...split. Oh, okay.

SENATOR WITEK: We split a long time ago.
