

January 10, 1996

value is it to have a member of what is called the minority group on this floor who goes along to get along? You need somebody who will take that board and hit the mule upside the head and get the mule's attention. And I intend to do it, and there is nothing anybody on this floor can do to stop me. And when you all bring old Christian Tom in here this morning, you can't make me sit in my seat if I choose to stand. You cannot stop me from standing with my back to him if you can find a way to get him on this floor over my objection. And if I speak out while he's speaking, what will you do? Will you call in a state trooper to put handcuffs on me and take me out of here? That might not be such a bad move for both of us. It'd show everybody what you all are not going to stand for, and it would show the people that I represent what lengths you'll go to to silence me. Oh, we're going to be those battling scorpions in the bottle this session and we may as well get started. I read a statement, even though I'm digressing because I'm going to support Senator Maurstad's amendment to show how reasonable I am and how persuasive Senator Maurstad has been up to this point. Maybe he can persuade me on some other aspects of this if he takes a position with which I agree. There was a young, silly bimboish black woman who was given a chance to play what she thought was a choice role in a movie called "Show Girls" which was demeaning, degrading, and despicable in the way it handled women. She came on the set and she knew that she was going to have to take her clothes off and they wondered if she would be able to. So the first day this fool came on the set you know what she did? She stripped naked and said since I'm going to have to spend a lot of time naked making this movie, we may as well get used to it. My being naked, you're seeing me naked. Well, using her example, I want you all to get used to what we're going to do this session. And I'm going to enjoy it because I will be totally unfettered. In other sessions, I've tried to be reasonable and accommodating on those issues and in those areas where accommodation was possible without sacrificing what I deem to be my principles. I'm completely free of that. This is no holds barred. And I'm going to watch how this particular proposal is voted on, but I want it made crystal clear by the words that I speak what my intentions...

SENATOR CROSBY: One minute.

SENATOR CHAMBERS: ...are so nobody has to speculate, nobody has to ask what I mean. But in case anybody is uncertain, I'm
