

amendment, and I really don't have that much of an opinion either way, I think we can get the figures that we want. But what it is exactly that Senator Witek plans to...what kind of a report she thinks this amendment will actually generate, and what kinds of statistics you really think will be included in that, with the way this is written, so if you would yield for a short period of time here, Senator Witek, and tell me exactly what elements you think would be in that report under this amendment.

SPEAKER WITHEM: Senator Vrtiska. You're yielding your time to Senator Witek?

SENATOR HILLMAN: No, I've asked her a question.

SPEAKER WITHEM: Oh, you're ask...pardon me, pardon me. Senator Witek, will you respond to a question from Senator Hillman?

SENATOR WITEK: Well, one of the points that you make is that it does affect a lot of different agencies. It is pretty bureaucratic in nature and pretty far-reaching in nature. So...so I guess under the administration costs would be the same costs that they have assessed within the fiscal note that they've given us for this initial cost to the bill. And then the costs...any additional costs due to the language that we've passed in the Legislature, I don't know all the areas that that would affect. I imagine the people who are supposed to be administering it will and hopefully do, at the time that they're doing it, will know whether that's in reaction to 592 or in reaction to something else, so that they can keep the 592 costs all together and then report that to us, because they're supposed to be...if they're reporting to us how many licenses have been revoked, then those same individuals would be aware of whatever costs it's taken to revoke those licenses. And if you're asking me, should we...shall we put the court costs in and everything else? Yes, yes, I think we should know all the costs that it's going to take to put this into practice, because we're going to, the taxpayers are going to be incurring all those costs.

SENATOR HILLMAN: Okay. Then the other thing, I guess, I would just add to that is I think up front you probably would be able to do that maybe the first year or so. But eventually we're talking about child support collection in total. And to be able
