

This has to do with my concern for Nebraska's families. So, I do resent your saying that it has to do with politics, at least from my concern about this bill. One of my concerns is for Nebraska's taxpayers who are going to have to foot the bill for this monstrosity, that we don't have any idea whether it is going to work, how well it is going to work, how many people it is going to hurt along the way. You are mandating to Douglas County and Lancaster County so they have to go hire a referee for your programs here. This is what the public is sick to up to here, myself included is this type of bureaucratic approach. All somebody has to do is knock on the door of the Legislature, say we have this problem with child support collections, solve it for us. And instead of a common sense approach like my amendment which would do it incrementally, efficiently, effectively, I believe and much simpler, we have to come up with this bureaucratic, nonsensical approach and for what reason? For what reason? So that somebody can have the words, the License Revocation Act on their resume, is that what you did it for, because really you are the one that is pushing the bill, you tell me if you are doing it for somebody's election campaign, because I am not here about that and that is not my reason for wanting to try to make this a better bill. It is clear to me that you are going to spend an awful lot of taxpayer money, you are going to hire five new people, five new people that we are going to have to pay retirement for and you know we talked about this retirement bill earlier in the year. These retirements are expensive and you are putting it on my children's bill, that is who is going to have to pay for the retirement of all of these people that you are hiring now. And these people who are supposedly, supposedly conservative fiscally, yes I am a fiscal conservative people, you know, this is where your social liberalism is costing the taxpayers money and if you don't see it and if you don't understand it then stop telling people that you are fiscal conservatives, because you are not. Obviously you are not. If you are willing to go out and spend half a million dollars a year to put together a bunch of referee's in a bureaucracy that is already a mess, lets face it people, this whole system is a mess right now. We have all wanted to take a real concerted look at it and we don't have the time. Then here we have a chance to actually maybe make a slight adjustment that might help with the collection of child supports in this state and instead we are going to make them jump through hoops have referees in their lives, ripping their license out, not even having any flexibility in the system and I
