as well, like corporations and businesses and so forth. If we are going to look at adjusted gross income in the district, then we need to factor in all that income I believe. The other thing that the amendment does is, instead of then dividing that gross return by the number of Nebraska income tax returns, it divides it by the average daily membership in the schools because, as you and I both know, the numbers of returns don't necessarily reflect the numbers of people paying those taxes because a lot of people, frankly, file joint returns, and so it would skew results.
