

him. I guess nobody wants to drive fast as far as the record goes, but yet they all have speeding tickets, so evidently they must drive fast sometime. Senator Schmitt, if you'd answer a couple questions, please. I like to drive about 62, so I'm going about 7 miles over the speed limit. If we set it at 60, and if I go 67, will I get picked up?

SENATOR SCHMITT: If you go 67, if the speed limit is set at 60, I think there's a possibility that you could, Senator Schellpeper, yes. As Senator Chambers had mentioned earlier today when we were talking about this, enforcing the law at one or two over the speed limit, I don't think that would happen because of speedometer error, machine error, whatever it may be. But I think once you hit that magical four or five I think you could get a ticket, yes.

SENATOR SCHELLPEPER: So I could be driving 62, 63, and probably not have any problem.

SENATOR SCHMITT: I think that's probably true, it might depend on the officer's mood that day.

SENATOR SCHELLPEPER: For the record, would you recommend that for the record? Would you recommend that?

SENATOR SCHMITT: What, the officer's mood? (Laughter)

SENATOR SCHELLPEPER: No, that we get to go 62, 63. I think...

SENATOR SCHMITT: No, I wouldn't.

SENATOR SCHELLPEPER: I think that going 65, to me, is not too fast. We have a lot of roads in northeast Nebraska where you can go 65 real easy and not have a bit of problem. And there's some where you shouldn't be going 65, 50 is too much. But I think that's where common sense comes into play. And if you use common sense and drive what you think should be reasonable, but I don't think we should come in and tell people that you can only go 60 on a road, on some of these new highways that are designed to go 65. The cars are safer, the roads, a lot of them are flat, you don't have the hills, so I think if you would leave it up to the state to decide which ones to go down to 55, or 60, or whatever they are, that would be a lot better. I know there would be some confusion then if you pulled on from a side
