

CLERK: Mr. President, Senator Dierks offers LR 330 on page 1016.

SENATOR COORDSEN: Senator Dierks.

SENATOR DIERKS: Thank you, Senator Coordsen and members of the Legislature. I, too, am pleased to recognize the Chambers Coyotes lady basketball team from Chambers, Nebraska in my district. They have won this tournament with a 26-0 record. They have a young lady on their team who is an outstanding basketball player. They have several young ladies on their team that are outstanding basketball players. But the one lady I'm speaking of, though, is Darcy Stracke, and she came to state as a freshman, from Stuart, and she came to state again as a sophomore, junior, and senior, right when she moved to Chambers. She set a record for scoring, both girls and boys, this year with 2,752 total points. An amazing young lady, a fine, a fine athlete and a fine person. And if you have a chance to read the front page of the World Herald this morning there's a story about a young man who she has been dating who is down here for the basketball tournament, men's basketball tournament, playing for Stuart. He had a serious automobile accident, was pretty well beat up, had a broken arm and a broken leg and was not able to compete in football anymore, but is starting for Stuart this...today. Anyway, I'd like to ask your, your approval of this recommendation and congratulate this Chambers basketball team. Thank you.

SENATOR COORDSEN: Thank you, Senator Dierks. Senator Chambers on the Chambers resolution.

SENATOR CHAMBERS: Mr. President and members of the Legislature, I followed these youngsters and all I can say is they did it again. They've upheld the honor of the family name and I extend my especial congratulations and appreciation. Oh, and by the way, I'm going to play the lottery and, Senator Dierks, if I win it, I'm going to buy whatever's available in Chambers and I may even consider moving out there.

SENATOR COORDSEN: (Laughs) Thank you, Senator Chambers. Mr. Clerk, next resolution.

CLERK: Mr. President, Senator Witek offers LR 331, found on
