

And I'm going to need some more time, if somebody will be kind enough to offer it. Senator Dierks, there is no plan in place. Do you agree with that? There is no plan for the implementation of any of this in the bill. Do you agree with that?

SENATOR DIERKS: Somewhat.

SENATOR CHAMBERS: Well, those who are supporting the bill say there is no plan, it doesn't come into being until some time in December, if they decide that they're able to come back with something.

SENATOR DIERKS: Well, I look at it as sort of a master plan, the one that allows them to do the work, get the thing set up, set up the structures, and then we do the plan you're talking about next year.

SENATOR CHAMBERS: Would you call it a master plan, or just a broad, general outline with no details within it?

SENATOR DIERKS: Yes and yes.

SENATOR CHAMBERS: All right. Now, if I had a master plan for a house, shouldn't somebody be able to look at that master plan and tell how many rooms there will be, what each room is going to consist of, how many walls, how many doors and so forth? Isn't that what a master plan is?

SENATOR DIERKS: But maybe the master plan involves buying the acreage and deciding where the house is going to be set up and where the barn is going to be and the silo without doing the specifics.

SENATOR CHAMBERS: But, Senator Dierks, you know what is going to be in the house. I'm talking about the master plan for the house. If you've got some what you... If somebody came to you, an architect, and said, this is the master plan, and what they have is we're going to have three acres, we're going to have a house and it will have some rooms in it, and the rooms will have a ceiling, a floor and some doors and windows. You...would that be...would you pay that architect and say well this is a...

PRESIDENT ROBAK: One minute.
