

March 25, 1996

I 3 1177

variables.

SENATOR MCKENZIE: Right.

SENATOR KRISTENSEN: It doesn't work very well.

SENATOR MCKENZIE: Example...exactly, but let me, let me use as an example Clay County because I have the numbers, both their sales tax, their net taxable sales and some understanding of their property levies and population. Because none of the communities in Clay County have a sales tax within the city now, if they were to enact the one or half to one-and-a-half-cent county sales tax, their taxable sales, net taxable sales from 1994 was about, were about 23,205,000. If I understand this right, if they, if they adopted a penny, that would give them about 232,000 more to use for those restrictive, restricted public services, public safety.

SENATOR KRISTENSEN: Okay.

SENATOR MCKENZIE: They could pool that, is that correct?

SENATOR KRISTENSEN: Well,...

SENATOR MCKENZIE: The county.

SENATOR KRISTENSEN: ...the public safety is they can use that, that nickel of the levy plus the county could use their sales tax...

SENATOR MCKENZIE: Right.

SENATOR KRISTENSEN: ...if they chose to do a countywide sales tax.

SENATOR MCKENZIE: Right. So they could take both the sales tax, county sales tax plus that nickel that they can allow...

SENATOR KRISTENSEN: Right.

SENATOR MCKENZIE: ...in additional property levy,...

SENATOR KRISTENSEN: Right.
