

Senator Vrtiska, my apologies for interrupting.

SENATOR VRTISKA: Maybe what I'm saying isn't worth even recording, but I'm going to go ahead anyway. The point I'm trying to get at is I think we need a mix. I think we need a good mix of people. And the problem that I have in trying to get the mix is no matter how you do it, there's going to be a question of whether it was done properly. I think we all understand that. However, I do appreciate some of the things you're bringing out and I think they have some merit because I guess I'm of the feeling that this was done probably because it was the most...maybe the easiest to do and still was a broad spectrum of the body in some of the areas that actually deal with unfunded mandates. But I agree with you that maybe we could either broaden this or maybe make some adjustment. I think that Senator Janssen has indicated that he's not terribly tied to this. And so I guess rather than interrupt you like I did because I didn't know what you were going to do, I think maybe you should get back at your task and work out something and maybe that will even be better and more acceptable. So I'm going to let you go back to your task and get off the phone here. Thank you.

SENATOR CHAMBERS: Just one comment. I don't know if I said anything, but I did listen.

SENATOR BERNARD-STEVENS: Thank you, Senator Vrtiska. Senator Bromm.

SENATOR BROMM: Mr. Chairman, I would give Senator Janssen some time.

SENATOR BERNARD-STEVENS: Senator Janssen, you have five minutes to use up while they try to discuss their amendment.

SENATOR JANSSEN: Thank you, Mr. Speaker. I believe Senator Chambers I think is on the right track. I mean if Senator Bromm and Senator Chambers I think can get this thing worked out while I speak here, I see nothing wrong with going to the Exec Board. The people who are on the Exec Board I'm sure are very capable of setting up the committees or the people that should be on this advisory committee, if you want to call it that. But I believe they will come up with basically about the same thing that we have right now. Hopefully they will, that's why I
