

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office

March 10, 1999 LB 612

situation, and what the court said, it would be unfair for Donald to benefit, Donald was the fellow who was using this mechanism, the noncustodial parent, it would be unfair for Donald to benefit from his choice to incur debt, which gives rise to the depreciation, and build equity in his farm at the expense of his children. So I'm trying to...I'm going to throw this out and take it for a first thought. I'm not sure I've thought about it long enough, but I suppose there are lots of examples in urban situations where one might choose to build equity and avoid the short-term child support obligation in exchange for long-term gain. And I guess the question is, should a person be able to substitute investment and take depreciation and cut down on his support to his children, and then turn around and himself benefit from having done that in the long term through the appreciation of the assets and the benefit of the depreciation? You know, the more I think about this, the more...

PRESIDENT MAURSTAD: One minute.

SENATOR BEUTLER: ...I'm troubled, notwithstanding the fact that I, on the other side, I have sympathy with what you're trying to do for the average property owner out there or businessperson even.

SENATOR BAKER: I would address that in that it might be a very specific case. Obviously, there was a court case involving this. I wasn't aware of that. But that's not going to be a case that comes up very often, I wouldn't think. That person, and what I...my bill addresses is a legitimate person out there trying to build equity or...and some...most cases that I'm familiar with, they are actually farming now. And I can see your point. Yes, somebody might use this as a way to post...or eliminate some child support payments and build equity, but what really the crux of this bill is, is people that are out there now, self-employed...

PRESIDENT MAURSTAD: Time.

SENATOR BAKER: ...use...and not able to deduct their depreciation.
