LB 495

that. But it does do the money that's already there, that's been raised. It does not fund an ongoing program, but it does maybe help those schools that need a one-time injection of money that could be properly used for equipment. I would hope that it is for proper one-time uses and not continued of ongoing programs. But it would fund the equipment needs and I intended to talk a little bit more about that on...and I'll ask somebody. Perhaps Senator Stuhr could comment on how...what kind of equipment needs they would do. But it would fund one time with no continuous funding into the future. It gets into that educational fund one time and does direct that money to what that money was intended for, but it does not take it down the road into the future, so it does leave opportunity for those that are critical that it doesn't...takes away that grant money into the future. It does not do that then. It leaves that fund for what it was originally intended. But this it would direct one time the vocational education emphasis that Senator Stuhr is after. Just an idea, maybe we'll get to it, I don't know when, if we keep working on this bill. But it is an idea, I think, that I hope will come up in due time after we have this debate.

SENATOR COORDSEN: Thank you, Senator Wehrbein. Senator Stuhr, please.

SENATOR STUHR: Thank you, Senator Coordsen and members of the Legislature. Just a couple points. I was trying to listen intently to Senator Wehrbein. There seems to be some concern about the funding stream. The funding stream is going to continue to go to schools, whether it is designated in one particular area or not of the Innovation Funds. A comment as far as being very specifically trained--if you will notice in the amendment and in some of the handouts there are a number of programs that are offered. Students, most generally, take one or two courses, particularly in their junior high years, and possibly one or two because of...if students are planning to go ahead and get an advanced degree or going to community colleges, most of them just do not have the hours available. But it gives them some exposure to ag education, to business education. We have a number of students, I know, in the school that my children attended, at Bradshaw, that we had a wonderful business education program that taught them skills for life, some career guidance, just an exposure. Many of the schools are providing
