

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office

March 29, 1999 LB 822

structures on there to prevent stream bank erosion, and it's worked beautifully. There is sort of a dam that has an overflow, and what it's done is provide for better foliage behind the dam, because the water table has raised. Would this legislation that you're talking about affect Cash Creek? It flows into the Elkhorn at...oh, over near Ewing.

SENATOR BEUTLER: Senator, I don't believe Cash Creek, and...give me a chance to look through the documents,...

SENATOR DIERKS: Okay.

SENATOR BEUTLER: ...but I don't believe that's included at all in anything that...

SENATOR DIERKS: It's part of the Upper Elkhorn NRD watershed.

SENATOR BEUTLER: Right. The map that's over here on the north wall would be almost completely accurate, if not completely accurate, and you might look over there to see if it's included in the blue area.

SENATOR DIERKS: Thank you.

SPEAKER KRISTENSEN: Senator Beutler, you're recognized to close on your amendment to the committee amendments.

SENATOR BEUTLER: Senator Kristensen, members of the Legislature, this amendment wasn't intended to be anything that changed the intent of the bill, but it was an amendment that was intended to define for the department exactly what we mean. So that whatever map they make up, which becomes the basis for this bill, is made up on a definition of watershed that we all agree to. And I believe what the committee agreed to and what they intended to do, and Senator Bohlke has indicated this, was in those situations where the trout stream being protected was only one segment of a stream, that they intended to protect those portions of the watershed that flowed directly into that segment, or which flowed upstream, because including upstream is obviously important, because whatever comes into the stream, upstream, is going to flow downstream through the protected segment. And by and large, at least, that's what the maps show,
