singer you are, and I'm not going to either, so you can take some measure of...of credit on that. But anyway, Senator Chambers, I appreciate your bracket motion. I am going to support it. I wish it were a little shorter time because I would hope, as I see all these people gathered together, I think we should have them in a room somewhere and we ought to get this thing hammered out and then bring it back to the floor instead of spending all this time on the floor. Because there are so many issues and such a confusing...such confusion in this bill that I don't think there's very many people on the floor understand exactly what's happening. But as long as it is before us I'm going to take as much time as I can. And when...if this bracket motion fails and we get back to the bill, then I can provide, myself, all the time I will need by way of amendments and other parliamentary maneuvers. I will definitely keep us on this bill eight hours here and eight hours on Select File. I don't think some of my colleagues realize that when we were on that gun bill the only thing we were discussing were amendments I was offering, and the only provision that I had attempted to amend that took all the time was the amount that it would cost to get a license to carry one of these guns, to file for an application. And there were only two words involved in that, and we were able to generate enough...
