

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office

April 22, 1999 LB 835

news, and the best way, I think, to eliminate price discrimination is to provide instantaneous price information rather than price history. And in the cattle, for example, which is something I know about, history occurs in a very short time. What was going on 15 minutes ago may not be going on anymore. So my suggestion in this area and a possible reason for delay of implementation, although I certainly recognize Senator Dierks' concerns about doing this, Senator Coordsen mentioned the need to be first, where I would like to see us be first is in the introduction of information technology into this game or into this business or exchange, if you will. To me, it seems like information technology through the use of web pages, for example, if instead of requiring packers to report prices you had them available on a web page, there were...would be a couple of important advantages. One is that everybody would have access at the time the information is relevant. If the bid was on the web page, you could look at it instantly and see where...

PRESIDENT MAURSTAD: One minute.

SENATOR RAIKES: ...everybody is. On the other hand, you may decide that it would be appropriate for producers to make offers on web pages. I think that would be another area that would be well worth investigating. To the extent there is confidential information that wouldn't be disclosed, then you could have the Department of Agriculture provide a service of aggregating that information and displaying it on a web page of their own. At some point, this may all lead to exchange over the Internet, which I think would be a great advantage in the livestock industry in terms of all the objectives--access, representative prices, and transactions costs.

PRESIDENT MAURSTAD: Time.

SENATOR RAIKES: Thank you.

PRESIDENT MAURSTAD: Senator Vrtiska. Senator Vrtiska waives off. Senator Dierks.

SENATOR DIERKS: Thank you, Mr. President. Members of the Legislature, I...I think that...I'm interested in the
