

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE  
Transcriber's Office

April 27, 1999      LB 880

Kearney \$7 million, and then a new secure facility which we're also discussing as part of that bill is another \$8 million, or a total of \$19.2 million.

SENATOR CHAMBERS:      I realize my time is up. Thank you, Mr. President.

PRESIDENT MAURSTAD:    Senator Chambers.    Senator Thompson, you may continue.

SENATOR THOMPSON:    Thank you. I just would like to use my time to, again, emphasize some of the issues surrounding our juvenile justice system needs and to add that to the discussion. As you know, in our discussion of the juvenile justice system problems, we have pointed out that we've made a considerable commitment to the adult corrections system. At the same time, in our state we're seeing rising juvenile crime. We had a little dip last year, but the numbers that are coming into our facilities are still high and I just want to repeat those, since this is another opportunity to bring the point home. In 1994, in December, the Office of Juvenile Services had a total caseload of 624 cases. Two hundred and thirty-two of those were at our institutions at Kearney and Geneva. And April 13th of this year, there were a total of 975 cases. Three hundred and twenty-three of those are at Kearney and Geneva, and the others are in community placements, and that compares to last year, 830. Our numbers continue to rise. Our facilities are beyond capacity significantly. In fact, I will give you that capacity. The capacity at Kearney is supposed to be...the design capacity is 147 youth. We're averaging in a year, last year, 230 youth there--tremendous overcrowding. And you may remember seeing the pictures that I circulated of the housing units and how crowded those facilities are. Geneva has a design capacity, that's the girls facility, of 83 and an average population of 102 in the last year. So I bring these to the attention of the body because there is significant need to look at the overcrowding of those facilities, to use them more appropriately so they aren't a revolving door, to improve the programming and the staffing. But since we're talking mainly about facilities here, I will try to finish answering Senator Chambers' question. At Geneva, as you know, there is a facility, a 1926 building, a wooden structure, three stories, individual rooms that are bolt locked,
