

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office

May 3, 1999

LB 382

"may". These facilities, in other words, may generate this new economic activity, which activity may generate additional state and local tax collections. There is no guarantee. But the word "will" is designed to give the impression that there is a guarantee. Also, when a sentence is being constructed, there should be a parallel construction when you are using similar notions or trying to express them. Now, when we are talking about the two words "can generate", you're putting what the teachers in elementary school call the "helper" immediately in front of the verb, "can generate". But then when you get over to the end of the sentence, I guess the intellectual acumen of whoever was writing this failed,...

SENATOR DIERKS: One minute.

SENATOR CHAMBERS: ...and they put words between the helper and the verb. Instead of saying "will generate", they put "will in turn generate". So, if they're going to put the helper right next to the verb in the first part of the sentence, they ought to do it later on in the sentence, except that grammar construction, I'm talking about of language, means nothing to those who want us to put inferior quality legislation into our statute books.

SENATOR DIERKS: Time. Senator Chambers, your light is next.

SENATOR CHAMBERS: Thank you. Members of the Legislature, I would like to ask Senator Landis a question that is not convoluted.

SENATOR LANDIS: I'll do my best.

SENATOR CHAMBERS: Senator Landis, I'm going back to line 13, is it...well, we start in line 13, "The Legislature finds that convention and meeting center facilities can generate new economic activity which", and then they put the word "will in turn generate additional state and local tax collections". Is there a certainty that all of this is going to happen?

SENATOR LANDIS: There is (laugh)...we're pretty close to that sun also rises question. There is not a certainty about anything, Senator Chambers, and that would include the prospect
