LB 870

inspection. Part (8) of Section 3 adds a definition for "exempt" as those operations with fewer than 300 animal units and have not had a discharge into the waters of the state; and (9) adds a definition for "existing livestock waste control facility" as one that was in existence prior to April 15, 1998, does not have a permit, but has requested an inspection prior to January 1, the year 2000. Section 4 eliminates reference to the Livestock Waste Management Task Force. It exempts any livestock operation of less than 300 animal units from the permitting process, including the requirement to request an inspection. Part (2) establishes a permitting standard for existing livestock waste control facilities deemed to be in compliance if inspected by the department, properly maintained, and shows no visible signs of breakage, and shows no obvious signs of discharge, or the adequacy of capacity and other determinations made by the department, constructed in accordance with plans of the Natural Resource Conservation Service of the United States Department of Agriculture; and conditions for allowing a water well within 100 feet of a facility, which takes into account the depth to ground water, known flow and direction of the ground water, the structural integrity of the facility and the well if known, any other circumstances that may adversely affect ground water quality. These conditions were adopted in the most recent revision of Title 130. Also allows the department to consider other data or information. Section 5 changes a statutory reference. Section 6 requires those operations that are not exempt to request an inspection, and cancels the request for an inspection if made by an exempt facility. Section 7 substitutes the reference to "compliant livestock operation" for "existing livestock waste control facility", and Section 8 eliminates an unnecessary date referring to 1998 and provides a method of calculating the fee for modification of an existing facility, eliminates the references to the study that was completed. Section 9 includes a list of information to be included on an application. This...corporate officers and directors, stockholders owning at least 50 percent of the stock or assets, and persons responsible for operations of the proposed facility must be listed. The location of the livestock operation in other states wholly or partially owned or operated by the applicant; any unauthorized discharges of livestock waste at any facility owned or operated by an applicant which caused environmental damage in violation of the laws of the state where
