

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE  
Transcriber's Office

February 10, 2000 LB 701

everything I've heard over the years, are going to find Game and Parks a better partner on fences than they ever found the railroad to be. And I will...Larry Voecks up there I think is one of their best people in terms of dealing with landowners and being fair to landowners, and I'll be extremely disappointed if they wouldn't build a couple hundred yards of hog fence if that's what was needed. I'm sure they would. But did you want the remaining few seconds? I would be glad to give it to you.

PRESIDENT MAURSTAD: Senator Jones.

SENATOR JONES: Thank you, Senator Beutler. And the reason I brought this up was in our meeting Monday morning Game and Parks was there and they said they did build a short stretch of sheep-type fence for the adjoining landowner because it was his corral, side of his corral and stuff, and that's the reason I mention. It'd just be very seldom and...

PRESIDENT MAURSTAD: Time.

SENATOR JONES: ...and Senator Coordsen is right.

PRESIDENT MAURSTAD: Thank you, Senator Jones. Senator Schrock, on the Coordsen amendment.

SENATOR SCHROCK: Mr. Lieutenant Governor, members of the Legislature, I think for the record Game and Parks, in their meeting with us, and I think they represented the trails interest quite well, is willing to build the type of fence that's necessary for the type of practice used on that property. Now I got to thinking here, well, maybe somebody is raising buffalo. This four-strand, legal, barbed wire fence we have would not be adequate for buffalo, and I think that Game and Parks would be very cooperative with that landowner. Also, you know, in the rare case where there might be some sheep or hogs, you don't see many free-range hogs anymore, Game and Parks did say they were willing to build the appropriate fence. So, without making the bill any more complicated, I think the best thing for us to do is let them negotiate that with the landowner and, depending upon the type of farming practice or ranching practice that's being used in that area, I'm confident that Game and Parks will build the appropriate type fence. That would
