

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE  
Transcriber's Office

February 29, 2000 LB 1317

we're doing it.

SENATOR CROSBY: Thank you, Senator Landis. Any further discussion on the committee amendments? Seeing none, Senator Bromm, would you like to close on the committee amendments?

SENATOR BROMM: Very, very briefly, Senator Crosby. Senator Landis' comparisons and analogy to other areas is extremely accurate. And as far as I'm concerned, if we could have an amendment to this bill that would require all credit card applications to be either printed in large letters or be issued with a microscope or a magnifying glass, that would be fine with me, because a lot of that language in those...in those applications contains information that allows them to disclose things about you, unless you tell them they can't. And you know you put your Social Security Number and all kinds of stuff on there. And, by the way, one of the things that even if you "opt-in" in this bill here, they still can't disclose your Social Security Number; that is not able to be disclosed, that is I think a very important piece of information that you should have the right to not have floating around, unless you choose to make it available. That is all. I'll ask your support to adopt the committee amendments which basically cut...gut the bill and become the bill.

SENATOR CROSBY: Thank you, Senator Bromm. You've heard the closing on the committee amendments. All in favor vote aye, opposed no. Record, please.

CLERK: 29 ayes, 0 nays, Madam President, on the adoption of committee amendments.

SENATOR CROSBY: Thank you. Discussion on the advancement of the bill? Senator Kiel.

SENATOR KIEL: I just want, Madam President, members of the Legislature, I just want to take this opportunity, since Senator Landis so graciously provided me a lead in, I did have a bill that is not going to be coming out to the Legislature this year that provides for financial privacy. It does do what we have been talking about in terms of driver's license information. What the bill did was provide for an "opt-in", which meant that
