

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office

March 14, 2000 LB 1217

for these girls. I know that women's health is something that this body is very lukewarm...or concerned about. You have proven that with your votes to the Women's Health Initiative. But these girls are young women. Their life is before them and they need adequate healthcare. If they're already abusing substances and having alcohol problems, they are already having problems that will affect their health on down the line. I think that adequate healthcare is one of the most important things that we can provide and if we can get these girls turned around, we can't possibly do it in 52 days or even 5 months, but we have to have an adequate place for them to go, and I implore you to reaffirm your intent from last year that this money go toward the funding of this multipurpose building, notwithstanding the objections of the administration who would like to see this money go towards a parole revocation facility. That's new and completely different thoughts than we had last year. We have got to do something with what we have before we start building new facilities, and this would be on a campus that's already there. We wouldn't have to figure out where we need to put it, we wouldn't have to have that argument again, and I think that this is the best way to go about doing that, and I urge you to reaffirm your purpose from last year's. Thank you, Mr. President.

PRESIDENT MAURSTAD: Thank you, Senator Suttle. Further debate, Senator Redfield.

SENATOR REDFIELD: Thank you, Mr. Lieutenant Governor, members of the body. I also support allocating these funds and moving forward as quickly as possible in remedying the situation at Geneva. I do have one question for Senator Thompson, and perhaps she addressed it, but I know that as we have looked at the needs at Geneva we have been extremely concerned about the safety of the girls and the housing situation, their fire safety plan and the locking devices, and I was curious. I only see a date for the multipurpose building, which I understand will provide medical space or space for medical provisions, but I'm still concerned about how quickly we're going to move forward on the housing and why we didn't move forward on that immediately, Senator Thompson.

PRESIDENT MAURSTAD: Senator Thompson.
