

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office

March 23, 2000 LB 936

think we need to do it with a program that will work. Thank you.

PRESIDENT MAURSTAD: Thank you, Senator Raikes. Further debate on the Beutler amendment, Senator Matzke.

SENATOR MATZKE: Thank you, Mr. President and members of the Legislature. I'm afraid that I'm at a disadvantage because I don't have the expertise or knowledge or experience to really debate with Senator Raikes on computer programs. We all recognize his expertise in this area. He's absolutely correct. There were two studies done. I think...I think that...I think the idea of analysis of these programs is a splendid idea. I think it needs some...some perfection, though, and I have before me the...and I think you've all got copies, I've got the TRAIN evaluation. I should tell you what TRAIN means. It's Tax Revenue Analysis in Nebraska. I would only...I think it's an honest evaluation but I want to read you the paragraph under the heading Caution, and I quote: As noted above, this act is a policy tool to encourage businesses to locate in small to midsize counties, especially rural areas. However, TRAIN is designed to stimulate or simulate the whole Nebraska economy as one unit. That is TRAIN cannot extract the economic impacts on the targeted rural areas because it cannot distinguish between the qualified businesses located in urban areas versus rural areas. So we have an honest caution here that these studies have not yet been perfected to where we can say that they are a bible. I think there is one other aspect. If you project this out 10 or 20 years, you have to assume a great number of facts and data. I think the true test is what the Revenue Committee did to this bill. They attached a sunset. This bill is going to operate for four years. If it doesn't work in four years, the Legislature simply is not going to extend it. I think it will work. I've seen it work. If I, and later on I think, if I have the time, I will give you a personal example of how this type of thing worked in our area to create one of the finest businesses in the state, starting with 16 employees. I won't go into that now, but the matter of fact is that if it doesn't work, we don't have to run it longer than four years. And if it increases employment, that increased employment is going to be paying a 5 percent, approximately, income tax to the state, and at the same time, the employer, the corporation is going to get
