SENATOR LANDIS: ...off-site locales worrying about it, saying something like, we should get a tax credit. Understand, individuals now get an income tax credit for child care, a bill of mine from a number of years ago. Individuals get them. So as an employee or for whomever, if you are getting child care, you get a child care credit on your income tax, and that was a bill of mine about five years ago. The home care center needs long-term, stable contractual responsibilities. It seems to me they need slots that are filled by people that they know are going to pay, going to be there, and that the best thing for them is a stable demand, which this bill will assist and create.

SENATOR KREMER: Then if...if the corporation contracts with an outside child care provider and they would reduce the cost for that...those using the facility, that should save us some money for the state when we...we contribute to a child care...

PRESIDENT MAURSTAD: One minute.

SENATOR KREMER: Is there anything...

SENATOR LANDIS: Well, it's true if you move the expense away from the individual and to the corporation, yes, you would...you would...

SENATOR KREMER: There should be, otherwise they would...

SENATOR LANDIS: ...save something on the income tax credit that we have for the individual and it will move over to the corporate structure.

SENATOR KREMER: But that's pretty hard to put a figure on, that amount...

SENATOR LANDIS: It would be.

SENATOR KREMER: ...I suppose.

SENATOR LANDIS: Yes, that's right.

SENATOR KREMER: Okay, thank you very much.
