

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE  
Transcriber's Office  
FLOOR DEBATE

February 27, 2003 LR 14

for me to do is what I feel, and that is that gambling is not going to solve the problems of this state. And I don't think anybody would argue that point. It can provide entertainment. It can provide people to go for the kind of activities they like. But it's not going to solve our fiscal problem. Anybody that thinks it is is living in a fantasy world. I liked the article that Roger Wehrbein sent around that talks about Internet sales. That's what we ought to be talking about if we want to serve our problems. We ought to be talking about the money we're losing; not the money we're redistributing,...

SPEAKER BROMM: One minute.

SENATOR VRTISKA: ...but the money that we're losing; the fact that we can't collect on these Internet sales that are going, and they're getting larger and larger and larger every year. That's where our money is going. But to think that we can redistribute our funds and solve all the problems, to me, is pure foolish. It's obvious in what I've said that you will probably come to the conclusion that I'm not going to support this bill, and that's...you're correct. I'm not going to support it. I will be criticized by some of the people who are saying...and they've said, and it's true, there will probably be a petition out if you don't move this bill ahead, to go through the same thing. And by the way, I think the petition that was put out last year was the worst piece of legislation, proposed legislation, that I've seen since I've been up here. It was absolutely horrendous. But people signed petition. Now, whether they they signed it because they thought it was going to solve the problems of this state is probably true. They felt like...

SPEAKER BROMM: Time.

SENATOR VRTISKA: Thank you.

SPEAKER BROMM: Thank you, Senator Vrtiska. Senator Redfield.

SENATOR REDFIELD: Thank you, Mr. Speaker, members of the body. Like all of you, I hear from the citizens, and they say, we want casinos. And when I ask them the question, why, they always
