

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office
FLOOR DEBATE

March 11, 2003 LB 688

And if we get the nose of the camel into the tent, then efforts can be made, when the NCAA is having its conferences, and they're dealing with the agenda that's put together by the bureaucracy rather than the university presidents. The issue and the questions can be broadened and expanded. But I would like to ask a question of Senator Schimek, because she may know the answer. I never attended the University of Nebraska, so I don't know the answer.

SENATOR CUDABACK: Senator Schimek.

SENATOR CHAMBERS: Senator Schimek, when do classes begin in the fall at the University of Nebraska, if you know?

SENATOR CUDABACK: Would you yield, Senator Schimek?

SENATOR SCHIMEK: I will, Senator. I believe about the last week of August.

SENATOR CHAMBERS: Okay.

SENATOR SCHIMEK: Either the third or the fourth week in August.

SENATOR CHAMBERS: Thank you. Members of the Legislature, what I talked about the other day was a twelfth game that Nebraska is going to play. And that game will be played on...well, anyway, I will give it to you later on. But here's the point that I want to make. If academics were the important thing, this so-called athletic scholarship would have something to do with academic achievement, but it doesn't. These young men would be brought to the school to be scholars, not players. But they're not brought to school to be scholars. They're brought strictly to be players. And because of this, a very talented freshman, which, in effect, is a high school kid, will play his first big-time college football game before he attends his first class. Now, those of you all who are trying to talk about how great the NCAA is, and all the great things it's doing for these players, and people of the attitude of Senator Stuhr, that the players are getting so much, should wonder why the NCAA will allow scheduling that puts a freshman on the football field playing a game before he sets foot in his first classroom. Some
