

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE  
Transcriber's Office  
FLOOR DEBATE

April 3, 2003            LB 165

SENATOR KREMER: Oh, line 20 there?

SENATOR PREISTER: Yes, that's where it would start.

SENATOR KREMER: Okay. Okay, thank you. I didn't pick that up, so . . .

SENATOR PREISTER: It says where no public power entity is willing and able to assume operation of the facility, and since we have other public power entities here, it seems handling it within the state at least allows us to ensure that it's still public and that that's one option that should be explored. And (b) a regulatory compliance issue, which apparently is the case currently, they're having problems meeting their compliances so that would be one that would fall under the current situation. And then there's the third option and that's health and safety, and health and safety would obviously incorporate any risk to the public, any issues that would endanger the health and the well-being of the citizens or of the environment, and then indirectly to citizens.

SENATOR KREMER: Could that be somewhat subjective too then on health and safety, or...

SENATOR PREISTER: It isn't defined further and that would certainly be something that the board would make the determination on, but it at least gives some direction, at least these three guidelines.

SENATOR KREMER: Okay. One other question then. Would we have anybody in the state right now that would have the ability to manage a nuclear power plant? And you talked about having the management in state rather than out of state. I question whether we would have anybody that would have that capability.

SENATOR PREISTER: Senator, it's my understanding that we have two nuclear reactors and that we have Omaha Public Power District, that's been operating their facility as long as it's been in existence, and they're in the same proximity, a few miles farther north on the river, and they seem to have the
