

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office
FLOOR DEBATE

April 15, 2003

LB 435

age. I didn't realize that. But I still wouldn't use that in my own store. It's just too much paperwork, to be quite truthful about it. But I do rise up in opposition to this. I would like to be very brief here and address one thing Senator Beutler said. He made the statement again that he didn't know why there was so much commotion over something that was going to affect maybe 4 percent of the people. And the reality is, it's going to affect all of the people, because this increases all wages, not just the people on minimum wage. And I wish you would remember the numbers I gave you, my personal experience. Those are accurate numbers. That's how it's going to affect small business throughout Nebraska. And I just wish you would keep those numbers in mind. Thank you.

SPEAKER BROMM: Thank you, Senator Cunningham. Senator Chambers.

SENATOR CHAMBERS: Mr. President, members of the Legislature, obviously, I don't like this amendment when compared to what Senator Beutler had offered. But since we're kind of moving by increments, trying to get from where we are to something that might be better, I'm not going to resist this amendment. But since others are discussing it very seriously, and I think it should be discussed seriously, I have to stay on this religion kick. And for all you all know, before the session is over I may be a Christian...or, how do you say, a "Crishun?" Well, whatever it is. But I don't want Senator Redfield to think what I'm saying applies to her. It's just a comment she made, and others have, that made me think of this. She had said, in speaking of some of these plans or proposals for increasing minimum wage, that only 7 percent of the population that we're talking about would be affected, and it's the word "only" conjoined to "7 percent." Now, that's as much as want Senator Redfield to be responsible for. This rest is on me and Jesus. He gave parables. And he talked about this shepherd who had 100 sheep. Ninety and nine were safe. Only one was lost, only one. That's less than 7 percent. And this guy was called a good shepherd. And you know what he did? He made sure that the ninety and nine were secure; then he went looking for that one that was lost, that one-one hundredth that was lost, that one penny out of the dollar that was lost. And then there was an
