Transcriber's Office
FLOOR DEBATE

February 25, 2004 LB 1049

Health insurance doesn't tolerate it. Car insurance does not tolerate it. They do not tolerate the swoop and squat people who defraud the automobile insurance system. I'm here to say that the only class of people we are excluding from this program are the ones who it was never meant to cover in the beginning. When unemployment insurance was devised, it was meant not to cover people who just walk away from their job when they could still have a job. Again, let's look at the bottom line. Almost \$10 million in two years is a lot of money. And like I said, I've got the bill being held hostage in Revenue right now, because of an \$830,000 fiscal note. It started out with \$3 million, and I got kind of offered an olive branch and said, what can you do, can you bring it down to \$1 million? Immediately I went to Revenue, and we fixed it so it was \$830,000 instead of \$3 million. And it's still being held there because of the revenue consideration. This is 11 times that amount of money. And we're still talking about the rights of people to use it as an entitlement program, as opposed to a catastrophic wage replacement program. Please look again at the fiscal note. Please think about the kind of people that the program is meant to assist. If someone is caught in the middle, like Senator Chambers mentioned yesterday, from the...between the AL...administrative law judge and the district court, there are other social programs that are...

SENATOR CUDABACK: One minute.

SENATOR COMBS: ...out there that can help them. We have food banks. We have heating assistance programs. We have welfare. We have food stamps. We have churches that help people. We're not talking about people that just want to go home and sit in the rocking chair; we're talking about the...like we referred to yesterday, the dolphins that get caught into the big net with the tuna that we're trying to catch. There are programs there to help them. And I just can't stress enough, \$10 million. Where else are we going to be able to recover that kind of money with any other bill? And we're doing the fiscally responsible thing for the people that are paying into the fund and for the taxpayers of Nebraska who are going to have to overall bear the burden in the end of replacing money in the trust fund that's being depleted by the people that are utilizing it under these
