

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office
FLOOR DEBATE

March 8, 2004

LR 209

after that first one can be held accountable. We are accountable for what we do. And I'm sure there will be senators on this floor who will go to these schools and talk to these young people about the constitution and the law,...

SPEAKER BROMM: One minute.

SENATOR CHAMBERS: ...about the majesty of the law, the dignity of the constitution. Then you will put manure, literally, in the constitution because chambers of commerce and Walt Radcliffe are telling you to do it. And you all get angry at me because I try to get us to legislate at a high level of quality. You get tired, your rear end gets sore, and you get mad and you grumble. But I'm a part of this process and everything I do I'm trying to make it better. You have people out there who have contempt for you, who never show anything but contempt. But all they have to do is say trot, sit, bark, roll over, play dead, and you do every one of them, and you're not offended because they build in you a self-hatred that you can project from you and them on to me. But I'm strong and I can take it, and I'm still going to continue to speak for the constitution and against this nonsense, this inappropriate conduct. Thank you, Mr. Speaker.

SPEAKER BROMM: Thank you, Senator Chambers. Your time is up. (Visitors introduced.) Senator Tyson.

SENATOR TYSON: Thank you, Mr. Speaker. There are very few times, as this body knows, that Senator Chambers and I are in general agreement on something, and the lottery happens to be one of those subjects. People tend to confuse particular activities in their mind because it's...they all put it under one aspect--gambling, or to use an older phrase, gaming. The difficulty is that in past generations, while there has been games of chance requiring appliances such as roulette wheels, chuck-a-luck, one thing and the other, generally speaking, gambling has to be differentiated between house-run, house-profiting activities, and actually gambling. A card game playing, say, poker, whatever, for money is gambling. And while the house used to draw down a percentage, it was a relatively small amount, a per-hand fee. The same is true of a lot of other games. Gambling is, generally speaking, a mathematical
