Transcriber's Office
FLOOR DEBATE

March 9, 2004

LB 888

on it. That engine may be powered by natural gas or maybe unnatural gas. What I do know is that these issues have been going on for years. I served on the Urban Affairs Committee. I got in the crossfires of the gas wars. I sense that these gas wars are going to continue to go on unless there is something to try to resolve them. Senator Landis was good enough to conduct some mediation to try and sit down to do some negotiating to try to come up with a solution and to work out what ends up being year after year dueling bills or the Legislature becoming the court of last resort. And we have the municipals on one side, largely MUD, and we have the privates on the other side competing. And competition is healthy and competition is good. But when they're not able to resolve it on their own, when they can't get things done through the Public Service Commission, they come to the Legislature. And each side has their version of how to come to a solution. In the committee we attempted, during the time I was there, and Senator Hartnett most ably...ableblab, "ableably" was handling it along with committee staff. We never fully resolved the issue. And we would work on the edges and we would do some things with service territories, but Senator Landis is absolutely right. We have this area down in Sarpy County that really, and it may be in more ways than one, no man's land. In this issue there needs to be some solution, some resolution, and I appreciate your efforts, Senator Landis, in doing it. I would ask you a question, Senator Landis. In your three-point description of what you would attempt to do, on the third one in the Sarpy County area you said that some of those areas that wouldn't be in the extended area outside of the city jurisdiction, in the zoning jurisdiction there would be I believe you said eight criteria for how the Public Service Commission would make their determination in what they would do in those areas. And I don't know, I don't believe that you cited what those eight criteria were and I don't know if you even have them handy. But if you do have those, could I get you to tell me what those are, please.

SENATOR CUDABACK: Senator Landis.

SENATOR LANDIS: Sure. The first thing it says is that you balance all eight of these rather than just make one like
