

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE  
Transcriber's Office  
FLOOR DEBATE

March 18, 2004      LB 1089

SENATOR WEHRBEIN: And part of it, you know, it's legitimate. I don't want to leave the wrong impression, but it's interest that accumulates on some things that we hadn't planned on a year ago. It's not something that's been there. A lot of these are interest, like the Health Care Cash Fund, that it accumulates some interest and it's unappropriated, so we've taken it.

SENATOR RAIKES: Okay. And I...you said this morning that as near as you can tell you've kind of gone to the max on that. You really don't know of anything else that's out there that could be...

SENATOR WEHRBEIN: Right, and it isn't to say there won't be some show up. It's just since a year ago till now. I can say a lot of it is interest building up on some...on funds that are not...that are dedicated to something else but the money that comes from interest is there to use if it's not appropriated.

SENATOR RAIKES: Okay. On line 22, on page 7, there is a...for the current fiscal year there is a minus 50...almost \$54 million. What does that include and/or where do I find that total as I look back in the blue book here?

SENATOR WEHRBEIN: \$43 million of that was the Medicaid credit that we got from the feds on Medicaid, Senator Raikes. That's what I thought it was. I can't...the other 10 I can't give you off the top of my head but we got a big chunk of federal match reimbursement, that the match rate was changed a year ago.

SENATOR CUDABACK: One minute.

SENATOR RAIKES: So those are basically reductions in appropriations that came about in part because of the \$43 million from the federal government and in part because there was a change in the match rate.

SENATOR WEHRBEIN: Yes. Page 17 shows that, line 25 under reductions shows the \$43,153,000 that I was talking about, and I think if you go down the line there, there probably would be some other explanations as I analyze that.
