FLOOR DEBATE

March 24, 2004 LR 209

SENATOR CUDABACK: It's tough to know where to start, I guess. I chose this bill as my priority bill for one reason. I guess I thought I was doing something good for Nebraska, I really did, and I still do. I still believe in it. Senator Chambers has been, on this issue here, he's probably correct and I support what he's doing here. Some things I support Senator Bourne, I think. Senator Schimek said she did. I guess we're lucky maybe...and it is a Lincoln bill, and that's all right, that's all right. We need a host county. We need somebody to take the fall, so to speak. We maybe, you know, I'm glad they want it, I really am glad they want it. Senator Schimek, that's nothing to be ashamed about. She's not even here, hearing me, not that anybody is. But there's nothing wrong with being a Lincoln bill. We need a host county. We need a host city. We need somebody who takes the State Fair. Now, here's the other option. We could sell this. We could do away with the State Fair. We could turn it over to some rich, for lack of a better word, wealthy people and turn it into a parking lot, turn it into another place where...have houses close together and do this and they'd make a lot of money and the people would rent them out and do this and that. We could do this. There would be a lot of people want that land. It's in the heart. Just like the watermelon, my mother always gave me heck for dishing out the heart of the watermelon, you know, and eating it. I liked that. Well, that's kind of the heart of Lincoln, in the area right close to the college or university. It's good land. We can turn that into, you know, whatever. Turn in...turn it into a Wal-Mart. We need another Wal-Mart. I better not say that. They may get after me. But, you know, we could turn it into a business venture. We could do that, sell it, use the money for something else. You know, we need it there for our kids. We hear so much today about kids, do something for the kids, do something for the kids, do something for the young people, do something for this. What better thing can you do? For ten days they have the option of going, looking at the ducks. I don't like those smelly cows either. The manure, I don't like that. I don't blame Senator Mines' kids for not wanting to walk through it. You know, that isn't all there is. There's ducks and chickens. They don't smell quite as bad as the hogs. But there's a lot of things. You can go through the
