

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE  
Transcriber's Office  
FLOOR DEBATE

April 1, 2004

LB 1090

much as I'd like to think that we could trim a little here and trim a little there and find \$151 million, I don't think that's possible. I think the prudent thing here to do is to raise a tax, pay off the judgment as quickly as possible, and put it behind us. And maybe Senator Janssen has offered us an idea here that will work. I don't know. But I have a couple of concerns. First, back to this whole question of the \$296 million deficit in the next biennium. I keep hearing senators use that number, and I cringe when I hear the number because I don't believe that number. I think we're in much deeper than that, because every time you say that we're in a \$296 million hole in the next biennium, what you're also saying is you believe revenues are going to magically rebound to something close to 7 percent per year the next two years. I think that's pure fantasy, and the sooner we realize that the better. My other concern is that the Janssen proposal, as I understand it, raises a couple of taxes but doesn't give direction as to where that money is going to go. It doesn't segregate those funds and put them into the nuclear waste litigation fund, I don't think. Maybe Senator Janssen could yield to a question on that point.

SENATOR SCHIMEK: Senator Janssen, would you yield for a question?

SENATOR JANSSEN: Yes.

SENATOR FOLEY: Senator Janssen, as I understand it, you want to raise the sales tax a quarter percent, you want to raise income taxes a bit, and those funds would just go wherever those funds would otherwise go from the other sales taxes and income taxes. Is that correct?

SENATOR JANSSEN: It would go to the Cash Reserve Fund.

SENATOR FOLEY: Cash Reserve. Would you object to the creation of a separate fund where these monies, above and beyond the existing sales tax and above and beyond the existing income tax, could be set aside and segregated into the nuclear waste litigation fund and used only for that purpose?
