

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE
Transcriber's Office
FLOOR DEBATE

April 6, 2004

LB 1083

council goes itself. And we talked about three of them, three members being licensed as psychologists or mental health practitioners, and three licensed as psychologists or mental health practitioners, one person who is a psychiatrist or psychologist, one mental health practitioner, and two public members. I would like, if there's no opposition on the floor, for Senator Byars or Senator Jensen, both, to say if they would have any problem with us trying to intent...put in that intent that one of them two either be a person of the cloth, because spirituality is a very big part of sobriety, or a person who is in sobriety. I would think it would be very beneficial to our profession to have somebody in either one of them two professions. If there's any objection, I wouldn't...I would step away from it. But I just want you to know that it's very important, part of any recovery in an addiction, to have what we call the spiritual leg or at least the experiential leg, and I'll talk about that later on another amendment after this amendment is handled. But there's three legs to recovery and one of them is experiential and that's people being in recovery, and one of the others is spiritual, not religious but spiritual. Would you, Senator Byars, please reply.

SENATOR CUDABACK: Senator Byars.

SENATOR BYARS: Thank you, Mr. President. Thank you for your support, Senator Pedersen. I know how meaningful this is to you and how many years you've spent working with individuals who have been abusers and who have a good deal of experience. The amendment does read that three of the members may be licensed as psychologists/mental health practitioners, and three whom are not licensed as either psychologists or mental health practitioners; one person who is a psychiatrist, psychologist, or mental health practitioner, and the other two members can be at large. I presume, and I'm not sure what Senator Jensen's intent might be relative to this issue, and I might yield some time to him, I personally would like to see a consumer if...who would be familiar with the 12 steps and who would be familiar with much of the treatment relative to this issue...

SENATOR CUDABACK: One minute.
