

LEGISLATIVE BILL 1226

Approved by the Governor April 13, 2006

Introduced by Langemeier, 23

AN ACT relating to the environment; to amend sections 46-229.02, 46-229.03, 46-229.04, 46-290, 46-291, 46-294.01, 46-2,112, 46-2,136, 46-655.01, 46-683, 46-691.03, 46-701, 46-706, 46-712, 46-713, 46-714, 46-715, 46-719, 46-739, 46-740, and 61-205, Reissued Revised Statutes of Nebraska, sections 2-945.01, 2-1588, 2-3225, and 2-3240, Revised Statutes Cumulative Supplement, 2004, section 77-3442, Revised Statutes Supplement, 2005, and section 46-602, Reissue Revised Statutes of Nebraska, as amended by section 2, Legislative Bill 508, Ninety-ninth Legislature, Second Session, 2006; to change notice requirements for projects under the Noxious Weed Control Act; to change provisions relating to the Natural Resources Development Fund; to provide and change tax levy authority for natural resources districts; to create the Storm Water Management Plan Program and the Interrelated Water Management Plan Program; to change provisions relating to water appropriations, the Water Policy Task Force, water wells, and the Nebraska Ground Water Management and Protection Act; to provide powers for the Department of Natural Resources; to harmonize provisions; to provide operative dates; to repeal the original sections; and to declare an emergency.

Be it enacted by the people of the State of Nebraska,

Section 1. A control authority may direct and carry out projects of control for one or more specific noxious weeds without individual notice as prescribed in section 2-955 if the control authority has caused publication of notices of such project as provided in this section. The notice shall be published in one or more newspapers of general circulation throughout the area over which such control authority has jurisdiction and shall be published weekly for four successive weeks prior to the project commencement date specified in the notice for the control project. Such notice shall state the noxious weed or weeds to be controlled by the project, the date the project will commence, and the approximate period of time when the project will be carried out. In no event shall a fine or lien be assessed against a landowner as prescribed in section 2-955 for a project under this section unless the control authority has caused individual notice to be served upon the landowner as specified in section 2-955.

Sec. 2. Section 2-945.01, Revised Statutes Cumulative Supplement, 2004, is amended to read:

2-945.01 Sections 2-945.01 to 2-966 and section 1 of this act shall be known and may be cited as the Noxious Weed Control Act.

Sec. 3. Section 2-1588, Revised Statutes Cumulative Supplement, 2004, is amended to read:

2-1588 (1) Any money in the Nebraska Resources Development Fund may be allocated by the commission in accordance with sections 2-1586 to 2-1595 for utilization by the department, by any state office, agency, board, or commission, or by any political subdivision of the state which has the authority to develop the state's water and related land resources. Such money may be allocated in the form of grants or loans or for acquiring state interests in water and related land resources programs and projects undertaken within the state. The allocation of funds to a program or project in one form shall not of itself preclude additional allocations in the same or any other form to the same program or project. Funds may also be allocated to assist natural resources districts in the preparation of management plans as provided in section 46-709. Funds so allocated shall not be subject to sections 2-1589 to 2-1595.

(2) No project, including all related phases, segments, parts, or divisions, shall receive more than ten million dollars from the fund. On July 1, 1994, ~~and each year thereafter~~ of each year, the director shall adjust the project cost and payment limitation of this subsection by an amount equal to the average percentage change in ~~the federal Department of Commerce, Bureau of the Census, Composite Construction Cost Index~~ a readily available construction cost index for the prior three years.

(3) Prior to September 1 of each even-numbered year, a biennial report shall be made to the Governor and the Clerk of the Legislature describing the work accomplished by the use of such development fund during the immediately preceding two-year period. The report shall include a complete financial statement. Each member of the Legislature shall receive a copy of

such report upon making a request to the director.

Sec. 4. Section 2-3225, Revised Statutes Cumulative Supplement, 2004, is amended to read:

2-3225 (1)(a) Each district shall have the power and authority to levy a tax of not to exceed four and one-half cents on each one hundred dollars of taxable valuation annually on all of the taxable property within such district unless a higher levy is authorized pursuant to section 77-3444.

(b) Each district shall also have the power and authority to levy a tax equal to the dollar amount by which its restricted funds budgeted to administer and implement ground water management activities and integrated management activities under the Nebraska Ground Water Management and Protection Act exceed its restricted funds budgeted to administer and implement ground water management activities and integrated management activities for FY2003-04, not to exceed one cent on each one hundred dollars of taxable valuation annually on all of the taxable property within the district.

(c) In addition to the power and authority granted in subdivisions (1)(a) and (b) of this section, each district located in a river basin, subbasin, or reach that has been determined to be fully appropriated pursuant to section 46-714 or designated overappropriated pursuant to section 46-713 by the Department of Natural Resources shall also have the power and authority to levy a tax equal to the dollar amount by which its restricted funds budgeted to administer and implement ground water management activities and integrated management activities under the Nebraska Ground Water Management and Protection Act exceed its restricted funds budgeted to administer and implement ground water management activities and integrated management activities for FY2005-06, not to exceed three cents on each one hundred dollars of taxable valuation on all of the taxable property within the district for fiscal year 2006-07 and not to exceed two cents on each one hundred dollars of taxable valuation annually on all of the taxable property within the district for fiscal years 2007-08 and 2008-09.

(2) The proceeds of such tax shall be used, together with any other funds which the district may receive from any source, for the operation of the district. When adopted by the board, the levy shall be certified by the secretary to the county clerk of each county which in whole or in part is included within the district. Such levy shall be handled by the counties in the same manner as other levies, and proceeds shall be remitted to the district treasurer. Such levy shall not be considered a part of the general county levy and shall not be considered in connection with any limitation on levies of such counties.

Sec. 5. Section 2-3240, Revised Statutes Cumulative Supplement, 2004, is amended to read:

2-3240 In matters pertaining to applications for appropriation and use of surface water, construction of dams, drainage and channel rectification projects, and installation of ground water wells, districts shall comply with Chapter 46, articles 2, and 6, and 7, and the applicable rules and regulations of the department.

Sec. 6. The Storm Water Management Plan Program is created. The purpose of the program is to facilitate and fund the duties of cities and counties under the federal Clean Water Act, 33 U.S.C. 1251 et seq., as such act existed on January 1, 2006, regarding storm water runoff under the National Pollutant Discharge Elimination System requirements. The Storm Water Management Plan Program shall function as a grant program administered by the Department of Environmental Quality, using funds appropriated for the program. The department shall deduct from funds appropriated amounts sufficient to reimburse itself for its costs of administration of the grant program. Any city or county when applying for a grant under the program shall have a storm water management plan approved by the department which meets the requirements of the National Pollutant Discharge Elimination System. Grant applications shall be made to the department on forms prescribed by the department. Grant funds shall be distributed by the department as follows:

(1) Not less than eighty percent of the funds available for grants under this section shall be provided to cities and counties in urbanized areas, as identified in 64 Federal Register 68822, that apply for grants and meet the requirements of this section. Grants made pursuant to this subdivision shall be distributed proportionately based on the population of applicants within such category, as determined by the most recent federal census update or recount certified by the United States Department of Commerce, Bureau of the Census. Any funds available for grants under this subdivision and not awarded by the end of a calendar year shall be available for grants in the following year; and

(2) Not more than twenty percent of the funds available for

grants under this section shall be provided to cities and counties outside of urbanized areas, as identified in 64 Federal Register 68822, with populations greater than ten thousand inhabitants as determined by the most recent federal census update or recount certified by the United States Department of Commerce, Bureau of the Census, that apply for grants and meet the requirements of this section. Grants under this subdivision shall be distributed proportionately based on the population of applicants within this category as determined by the most recent federal census update or recount certified by the United States Department of Commerce, Bureau of the Census. Any funds available for grants pursuant to this subdivision which have not been awarded at the end of each calendar year shall be available for awarding grants pursuant to subdivision (1) of this section.

Any city or county receiving a grant under subdivision (1) or (2) of this section shall contribute matching funds equal to twenty percent of the grant amount.

Sec. 7. Section 46-229.02, Reissue Revised Statutes of Nebraska, is amended to read:

46-229.02 (1) If, based upon the results of a field investigation or upon information, however obtained, the department makes preliminary determinations (a) that an appropriation has not been used, in whole or in part, for a beneficial or useful purpose or having been so used at one time has ceased to be used, in whole or in part, for such purpose for more than five consecutive years and (b) that the department knows of no reason that constitutes sufficient cause, as provided in section 46-229.04, for such nonuse or that such nonuse has continued beyond the additional time permitted because of the existence of any applicable sufficient cause, the department shall serve notice of such preliminary determinations upon the owner or owners of such appropriation and upon any other person who is an owner of the land under such appropriation. Such notice shall contain the information required by section 46-229.03, shall be provided in the manner required by such section, and shall be posted on the department's web site. Each owner of the appropriation and any owner of the land under such appropriation shall have thirty days after the mailing or last publication, as applicable, of such notice to notify the department, on a form provided by the department, that he or she contests the department's preliminary determination of nonuse or the department's preliminary determination of the absence of sufficient cause for such nonuse. Such notification shall indicate the reason or reasons the owner is contesting the department's preliminary determination and include any information the owner believes is relevant to the issues of nonuse or sufficient cause for such nonuse.

(2) If no owner of the appropriation or of the land under the appropriation provides notification to the department in accordance with subsection (1) of this section, the director may issue an order canceling the appropriation in whole or in part. The extent of such cancellation shall not exceed the extent described in the department's notice to the owner or owners in accordance with subsection (1) of this section. A copy of the order canceling the appropriation, or part thereof, shall be posted on the department's web site and shall be provided to the owner or owners of the appropriation and to any other owner of the land under the appropriation in the same manner that notices are to be given in accordance with subsection (2), (3), or (4) of section 46-229.03, as applicable. No cancellation under this subsection shall prohibit an irrigation district, a reclamation district, a public power and irrigation district, or a mutual irrigation company or canal company from asserting the rights provided by subsections (5) and (6) of section 46-229.04.

(3) If an owner of the appropriation provides notification to the department in accordance with subsection (1) of this section, the department shall review the owner's stated reasons for contesting the department's preliminary determination and any other information provided with the owner's notice. If the department determines that the owner has provided sufficient information for the department to conclude that the appropriation should not be canceled, in whole or in part, it shall inform the owners of the appropriation, and any other owners of the land under the appropriation, of such determination.

(4) If the department determines that an owner has provided sufficient information to support the conclusion that the appropriation should be canceled only in part and if (a) the owner or owners filing the notice of contest agree in writing to such cancellation in part and (b) such owner or owners are the only known owners of the appropriation and of the land under the appropriation, the director may issue an order canceling the appropriation to the extent agreed to by the owner or owners and shall provide a copy of such order to such owner or owners.

(5) If the department determines that subsections (2), (3), and (4) of this section do not apply, it shall schedule and conduct a hearing on the cancellation of the appropriation in whole or in part. Notice of the hearing shall be provided to the owner or owners who filed notices with the department pursuant to subsection (1) of this section, to any other owner of the appropriation known to the department, and to any other owner of the land under the appropriation. The notice shall be posted on the department's web site and shall be served or published, as applicable, in the manner provided in subsection (2), (3), or (4) of section 46-229.03, as applicable.

(6) Following a hearing conducted in accordance with subsection (5) of this section and subsection (1) of section 46-229.04, the director shall render a decision by order. A copy of the order shall be provided to the owner or owners of the appropriation and to any other person who is an owner of the land under the appropriation. The copy of the order shall be posted on the department's web site and shall be served or published, as applicable, in the same manner that notices are to be given in accordance with subsection (2), (3), or (4) of section 46-229.03, as applicable, except that if publication is required, it shall be sufficient for the department to publish notice that an order has been issued. Any such published notice shall identify the land or lands involved and shall provide the address and telephone number that may be used to obtain a copy of the order.

(7) A water appropriation that has not been perfected pursuant to the terms of the permit may be canceled by the department without complying with sections 46-229.01 to 46-229.04 if the owner of such appropriation fails to comply with any of the conditions of approval in the permit, except that this subsection does not apply to appropriations to which subsection (2) of section 46-237 applies.

Sec. 8. Section 46-229.03, Reissue Revised Statutes of Nebraska, is amended to read:

46-229.03 (1) The notice provided by the department in accordance with subsection (1) or (5) of section 46-229.02 shall contain: (a) A description of the appropriation; (b) the number assigned to the appropriation by the department; (c) the date of priority; (d) the point of diversion; (e) if the notice is published, the section or sections of land which contain the lands located under such appropriation; (f) if the notice is served by personal service or by registered or certified mail, a description of the lands which are located under such appropriation, a description of the information used by the department to reach the preliminary determinations of nonuse, and a copy of section 46-229.04; (g) a description of the owner's options in response to the notice; (h) a department telephone number which any person may call during normal business hours for more information regarding the owner's rights and options, including what constitutes sufficient cause for nonuse; (i) ~~if the notice is provided in accordance with subsection (1) of section 46-229.02 and is mailed,~~ a copy of the form that such owner may file to request a departmental hearing; ~~(j) if the notice is provided in accordance with subsection (1) of section 46-229.02 and is published,~~ contest such determination, if notice is provided in accordance with subsection (1) of section 46-229.02 and is mailed; (j) the location where the owner may obtain a form to file to request a departmental hearing contest such determination, if notice is provided in accordance with subsection (1) of section 46-229.02 and is published; and (k) if the notice is provided in accordance with subsection (5) of section 46-229.02, the date, time, and location of the hearing.

(2) For any owner whose name and address are known to the department or can be reasonably obtained by the department, the notice shall be served by personal service or by registered mail or certified mail. Any landowner's name or address shall be considered reasonably obtainable if that person is listed as an owner of the land involved, on the records of the county clerk or register of deeds for the county in which the land is located.

(3) For any owner whose name and address are not known to the department and cannot reasonably be obtained by the department, such notice shall be served by publication in a legal newspaper published or of general circulation in any county in which the place of diversion is located and in a legal newspaper published or of general circulation in each county containing land for which the right to use water under the appropriation is subject to cancellation. Each such publication shall be once each week for three consecutive weeks.

(4) Landowners whose property under such appropriation is located within the corporate limits of a city or village shall be served by the publication of such notice in a legal newspaper published or of general circulation in the county in which the city or village is located. The notice shall be published once each week for three consecutive weeks.

Sec. 9. Section 46-229.04, Reissue Revised Statutes of Nebraska, is

amended to read:

46-229.04 (1) At such hearing the verified field investigation report of an employee of the department, or such other report or information that is relied upon by the department to reach the preliminary determination of nonuse, shall be prima facie evidence for the forfeiture and annulment of such water appropriation. If no person appears at the hearing, such water appropriation or unused part thereof shall be declared forfeited and annulled. If an interested person appears and contests the same, the department shall hear evidence, and if it appears that such water has not been put to a beneficial use or has ceased to be used for such purpose for more than five consecutive years, the same shall be declared canceled and annulled unless the department finds that (a) there has been sufficient cause for such nonuse as provided for in subsection (2), (3), or (4) of this section or (b) subsection (5) or (6) of this section applies.

(2) Sufficient cause for nonuse shall be deemed to exist for up to thirty consecutive years if such nonuse was caused by the unavailability of water for that use. For a river basin, subbasin, or reach that has been designated as overappropriated pursuant to section 46-713 or determined by the department to be fully appropriated pursuant to section 46-714, the period of time within which sufficient cause for nonuse because of the unavailability of water may be deemed to exist may be extended beyond thirty years by the department upon petition therefor by the owner of the appropriation if the department determines that an integrated management plan being implemented in the river basin, subbasin, or reach involved is likely to result in restoration of a usable water supply for the appropriation.

(3) Sufficient cause for nonuse shall be deemed to exist indefinitely if such nonuse was the result of one or more of the following:

(a) For any tract of land under separate ownership, the available supply was used but on only part of the land under the appropriation because of an inadequate water supply;

(b) The appropriation is a storage appropriation and there was an inadequate water supply to provide the water for the storage appropriation or less than the full amount of the storage appropriation was needed to keep the reservoir full; or

(c) The appropriation is a storage-use appropriation and there was an inadequate water supply to provide the water for the appropriation or use of the storage water was unnecessary because of climatic conditions.

(4) Sufficient cause for nonuse shall be deemed to exist for up to fifteen consecutive years if such nonuse was a result of one or more of the following:

(a) Federal, state, or local laws, rules, or regulations temporarily prevented or restricted such use;

(b) Use of the water was unnecessary because of climatic conditions;

(c) Circumstances were such that a prudent person, following the principles of good husbandry, would not have been expected to use the water;

(d) The works, diversions, or other facilities essential to use the water were destroyed by a cause not within the control of the owner of the appropriation and good faith efforts to repair or replace the works, diversions, or facilities have been and are being made;

(e) The owner of the appropriation was in active involuntary service in the armed forces of the United States or was in active voluntary service during a time of crisis;

(f) Legal proceedings prevented or restricted use of the water; or

(g) The land subject to the appropriation is under an acreage reserve program or production quota or is otherwise withdrawn from use as required for participation in any federal or state program or such land previously was under such a program but currently is not under such a program and there have been not more than five consecutive years of nonuse on that land since that land was last under that program.

The department may specify by rule and regulation other circumstances that shall be deemed to constitute sufficient cause for nonuse for up to fifteen years.

(5) When an appropriation is held in the name of an irrigation district, reclamation district, public power and irrigation district, or mutual irrigation company or canal company and the director determines that water under that appropriation has not been used on a specific parcel of land for more than five years and that no sufficient cause for such nonuse exists, the right to use water under that appropriation on that parcel shall be terminated and notice of the termination shall be posted on the department's web site and shall be given in the manner provided in subsection (2), (3), or (4) of section 46-229.03. The district or company holding such right shall have five years after the determination, or five

years after an order of cancellation issued by the department following the filing of a voluntary relinquishment of the water appropriation that has been signed by the landowner and the appropriator of record, to assign the right to use that portion of the appropriation to other land within and the district or the area served by the district or company or company, to file an application for a transfer in accordance with section 46-290, or to transfer the right in accordance with sections 46-2,127 to 46-2,129. The department shall issue its order of cancellation within sixty days after receipt of the voluntary relinquishment. The department shall be notified of any such assignment within thirty days ~~thereafter~~ after such assignment. If the district or company does not assign the right to use that portion of the appropriation to other land, does not file an application for a transfer within the five-year period, or does not notify the department within thirty days after any such assignment, that portion of the appropriation shall be canceled without further proceedings by the department and the district or company involved shall be so notified by the department. During the time within which assignment of a portion of an appropriation is pending, the allowable diversion rate for the appropriation involved shall be reduced, as necessary, to avoid inconsistency with the rate allowed by section 46-231 or with any greater rate previously approved for such appropriation by the director in accordance with section 46-229.06.

(6) When it is determined by the director that an appropriation, for which the location of use has been temporarily transferred in accordance with sections 46-290 to 46-294, has not been used at the new location for more than five years and that no sufficient cause for such nonuse exists, the right to use that appropriation at the temporary location of use shall be terminated. Notice of that termination shall be posted on the department's web site and shall be given in the manner provided in subsection (2), (3), or (4) of section 46-229.03. The right to reinitiate use of that appropriation at the location of use prior to the temporary transfer shall continue to exist for five years after the director's determination, but if such use is not reinitiated at that location within such five-year period, the appropriation shall be subject to cancellation in accordance with sections 46-229 to 46-229.04.

(7) If at the time of a hearing conducted in accordance with subsection (1) of this section there is an application for incidental or intentional underground water storage pending before the department and filed by the owner of the appropriation, the proceedings shall be consolidated.

Sec. 10. Section 46-290, Reissue Revised Statutes of Nebraska, is amended to read:

46-290 (1)(a) Except as provided in this section and sections 46-2,120 to 46-2,130, any person having a permit to appropriate water for beneficial purposes issued pursuant to sections 46-233 to 46-235, 46-240.01, 46-241, or 46-242, or 46-637 and who desires (i) to transfer the use of such appropriation to a location other than the location specified in the permit, (ii) to change that appropriation to a different type of appropriation as provided in subsection (3) of this section, or (iii) to change the purpose for which the water is to be used under a natural-flow, storage, or storage-use appropriation to a purpose not at that time permitted under the appropriation shall apply for approval of such transfer or change to the Department of Natural Resources.

(b) The application for such approval shall contain (i) the number assigned to such appropriation by the department, (ii) the name and address of the present holder of the appropriation, (iii) if applicable, the name and address of the person or entity to whom the appropriation would be transferred or who will be the user of record after a change in the location of use, type of appropriation, or purpose of use under the appropriation, (iv) the legal description of the land to which the appropriation is now appurtenant, (v) the name and address of each holder of a mortgage or deed of trust for the land to which the appropriation is now appurtenant, (vi) if applicable, the legal description of the land to which the appropriation is proposed to be transferred, (vii) if a transfer is proposed, whether other sources of water are available at the original location of use and whether any provisions have been made to prevent either use of a new source of water at the original location or increased use of water from any existing source at that location, (viii) if applicable, the legal descriptions of the beginning and end of the stream reach to which the appropriation is proposed to be transferred for the purpose of augmenting the flows in that stream reach, (ix) if a proposed transfer is for the purpose of increasing the quantity of water available for use pursuant to another appropriation, the number assigned to such other appropriation by the department, (x) the purpose of the current use, (xi) if a change in purpose of use is proposed, the proposed purpose of use, (xii) if

a change in the type of appropriation is proposed, the type of appropriation to which a change is desired, (xiii) if a proposed transfer or change is to be temporary in nature, the duration of the proposed transfer or change, and (xiv) such other information as the department by rule and regulation requires.

(2) If a proposed transfer or change is to be temporary in nature, a copy of the proposed agreement between the current appropriator and the person who is to be responsible for use of water under the appropriation while the transfer or change is in effect shall be submitted at the same time as the application.

(3) Regardless of whether a transfer or a change in the purpose of use is involved, the following changes in type of appropriation, if found by the Director of Natural Resources to be consistent with section 46-294, may be approved subject to the following:

(a) A natural-flow appropriation for direct out-of-stream use may be changed to a natural-flow appropriation for aboveground reservoir storage or for intentional underground water storage;

(b) A natural-flow appropriation for intentional underground water storage may be changed to a natural-flow appropriation for direct out-of-stream use or for aboveground reservoir storage;

(c) A natural-flow appropriation for direct out-of-stream use, for aboveground reservoir storage, or for intentional underground water storage may be changed to an instream appropriation subject to sections 46-2,107 to 46-2,119 if the director determines that the resulting instream appropriation would be consistent with subdivisions (2), (3), and (4) of section 46-2,115;

(d) A natural-flow appropriation for direct out-of-stream use, for aboveground reservoir storage, or for intentional underground water storage may be changed to an appropriation for induced ground water recharge if the director determines that the resulting appropriation for induced ground water recharge would be consistent with subdivisions (2)(a)(i) and (ii) of section 46-235; and

(e) The incidental underground water storage portion, whether or not previously quantified, of a natural-flow or storage-use appropriation may be separated from the direct-use portion of the appropriation and may be changed to a natural-flow or storage-use appropriation for intentional underground water storage at the same location if the historic consumptive use of the direct-use portion of the appropriation is transferred to another location or is terminated, but such a separation and change may be approved only if, after the separation and change, (i) the total permissible diversion under the appropriation will not increase, (ii) the projected consequences of the separation and change are consistent with the provisions of any integrated management plan adopted in accordance with section 46-718 or 46-719 for the geographic area involved, and (iii) if the location of the proposed intentional underground water storage is in a river basin, subbasin, or reach designated as overappropriated in accordance with section 46-713, the integrated management plan for that river basin, subbasin, or reach has gone into effect, and that plan requires that the amount of the intentionally stored water that is consumed after the change will be no greater than the amount of the incidentally stored water that was consumed prior to the change. Approval of a separation and change pursuant to this subdivision (e) shall not exempt any consumptive use associated with the incidental recharge right from any reduction in water use required by an integrated management plan for a river basin, subbasin, or reach designated as overappropriated in accordance with section 46-713.

Whenever any change in type of appropriation is approved pursuant to this subsection and as long as that change remains in effect, the appropriation shall be subject to the statutes, rules, and regulations that apply to the type of appropriation to which the change has been made.

(4) The Legislature finds that induced ground water recharge appropriations issued pursuant to sections 46-233 and 46-235 and instream appropriations issued pursuant to section 46-2,115 are specific to the location identified in the appropriation. Neither type of appropriation shall be transferred to a different location, changed to a different type of appropriation, or changed to permit a different purpose of use.

(5) In addition to any other purposes for which transfers and changes may be approved, such transfers and changes may be approved if the purpose is (a) to augment the flow in a specific stream reach for any instream use that the department has determined, through rules and regulations, to be a beneficial use or (b) to increase the frequency that a diversion rate or rate of flow specified in another valid appropriation is achieved.

For any transfer or change approved pursuant to subdivision (a) of this subsection, the department shall be provided with a report at least every

five years while such transfer or change is in effect. The purpose of such report shall be to indicate whether the beneficial instream use for which the flow is augmented continues to exist. If the report indicates that it does not or if no report is filed within sixty days after the department's notice to the appropriator that the deadline for filing the report has passed, the department may cancel its approval of the transfer or change and such appropriation shall revert to the same location of use, type of appropriation, and purpose of use as prior to such approval.

(6) A quantified or unquantified appropriation for incidental underground water storage may be transferred to a new location along with the direct-use appropriation with which it is recognized if the director finds such transfer to be consistent with section 46-294 and determines that the geologic and other relevant conditions at the new location are such that incidental underground water storage will occur at the new location. The director may request such information from the applicant as is needed to make such determination and may modify any such quantified appropriation for incidental underground water storage, if necessary, to reflect the geologic and other conditions at the new location.

(7) Unless an incidental underground water storage appropriation is changed as authorized by subdivision (3)(e) of this section or is transferred as authorized by subsection (6) of this section or subsection (1) of section 46-291, such appropriation shall be canceled or modified, as appropriate, by the director to reflect any reduction in water that will be stored underground as the result of a transfer or change of the direct-use appropriation with which the incidental underground water storage was recognized prior to the transfer or change.

Sec. 11. Section 46-291, Reissue Revised Statutes of Nebraska, is amended to read:

46-291 (1) Upon receipt of an application filed under section 46-290 for a transfer in the location of use of an appropriation, the Department of Natural Resources shall review it for compliance with this subsection. The Director of Natural Resources may approve the application without notice or hearing if he or she determines that: (a) The appropriation is used and will continue to be used exclusively for irrigation purposes; (b) the only lands involved in the proposed transfer are (i) lands within the quarter section of land to which the appropriation is appurtenant, (ii) lands within such quarter section of land and one or more quarter sections of land each of which is contiguous to the quarter section of land to which the appropriation is appurtenant, or (iii) lands within the boundaries or service area of and capable of service by the same irrigation district, reclamation district, public power and irrigation district, or mutual irrigation or canal company; (c) after the transfer, the total number of acres irrigated under the appropriation will be no greater than the number of acres that could legally be irrigated under the appropriation prior to the transfer; (d) all the land involved in the transfer is under the same ownership or is within the same irrigation district, reclamation district, public power and irrigation district, or mutual irrigation or canal company; (e) the transfer will not result in a change in the point of diversion; and (f) the transfer will not diminish the water supply available for or otherwise adversely affect any other water appropriator. If transfer of an appropriation with associated incidental underground water storage is approved in accordance with this subsection, the associated incidental underground water storage also may be transferred pursuant to this subsection as long as such transfer would continue to be consistent with the requirements of this subsection. If necessary, the boundaries of the incidental underground water storage area may be modified to reflect any change in the location of that storage consistent with such a transfer. Transfers shall not be approved pursuant to this subsection until the department has adopted and promulgated rules and regulations establishing the criteria it will use to determine whether proposed transfers are consistent with subdivision (1)(f) of this section.

(2) If after reviewing an application filed under section 46-290 the director determines that it cannot be approved pursuant to subsection (1) of this section, he or she shall cause a notice of such application to be posted on the department's web site, to be sent by certified mail to each holder of a mortgage or deed of trust that is identified by the applicant pursuant to subdivision (1)(b)(v) of section 46-290 and to any entity owning facilities currently used or proposed to be used for purposes of diversion or delivery of water under the appropriation, and to be published at the applicant's expense at least once each week for three consecutive weeks in at least one newspaper of general circulation in each county containing lands to which the appropriation is appurtenant and, if applicable, in at least one newspaper of general circulation in each county containing lands to which the appropriation

is proposed to be transferred.

(3) The notice shall contain: (a) A description of the appropriation; (b) the number assigned to such appropriation in the records of the department; (c) the date of priority; (d) if applicable, a description of the land or stream reach to which such water appropriation is proposed to be transferred; (e) if applicable, the type of appropriation to which the appropriation is proposed to be changed; (f) if applicable, the proposed change in the purpose of use; (g) whether the proposed transfer or change is to be permanent or temporary and, if temporary, the duration of the proposed transfer or change; and (h) any other information the director deems relevant and essential to provide the interested public with adequate notice of the proposed transfer or change.

(4) The notice shall state (a) that any interested person may object to and request a hearing on the application by filing such objections in writing specifically stating the grounds for each objection and (b) that any such objection and request shall be filed in the office of the department within two weeks after the date of final publication of the notice.

(5) Within the time period allowed by this section for the filing of objections and requests for hearings, the county board of any county containing land to which the appropriation is appurtenant and, if applicable, the county board of any county containing land to which the appropriation is proposed to be transferred may provide the department with comments about the potential economic impacts of the proposed transfer or change in such county. The filing of any such comments by a county board shall not make the county a party in the application process, but such comments shall be considered by the director in determining pursuant to section 46-294 whether the proposed transfer or change is in the public interest.

Sec. 12. Section 46-294.01, Reissue Revised Statutes of Nebraska, is amended to read:

46-294.01 Whenever a temporary transfer is approved in accordance with sections 46-290 to 46-294, the Department of Natural Resources shall applicant shall, within sixty days after the order of approval of the Department of Natural Resources, cause copies of the following to be filed with the county clerk or register of deeds of the county in which the land subject to the appropriation prior to the transfer is located: (1) The permit by which the appropriation was established; (2) the agreement by which the temporary transfer is to be effected; and (3) the order of the Director of Natural Resources approving the temporary transfer. Whenever renewal of a temporary transfer is approved pursuant to section 46-294.02, the ~~department~~ applicant shall, within sixty days after such approval, cause a copy of the order of the director approving such renewal to be filed with the county clerk or register of deeds of such county. Such documents shall be indexed to the land subject to the appropriation prior to the transfer. ~~The costs of the filing and indexing shall be charged to the applicant for the transfer or renewal, and failure to pay such costs applicant shall file with the department, within ninety days after the department's order of approval, proof of filing with the county clerk or register of deeds. Failure to file such proof of filing within such ninety-day time period shall be grounds for the director to negate any prior approval of the transfer or renewal.~~

Sec. 13. Section 46-2,112, Reissue Revised Statutes of Nebraska, is amended to read:

46-2,112 A permit to appropriate water for instream flows shall be subject to review every fifteen years after it is granted. Notice of a pending review shall be published in a newspaper published or of general circulation in the area involved at least once each week for three consecutive weeks, the last publication to be not later than fourteen years and ten months after the permit was granted or after the date of the director's action following the last such review, whichever is later, and such notice shall be mailed to the appropriator of record and posted on the department's web site. The notice shall state that any interested person may file comments relating to the review of the instream appropriation or may request a hearing to present evidence relevant to such review. Any such comments or request for hearing shall be filed in the headquarters office of the department within six weeks after the date of final publication of the notice. The appropriator of record shall, within the six-week period, file written documentation of the continued use of the appropriation. If no requests for hearing are received and if the director is satisfied with the information provided by the appropriator of record that the appropriation continues to be beneficially used and is in the public interest, the director shall issue an order stating such findings. If requested by any interested person, or on his or her own motion based on the comments and information filed, the director shall schedule a hearing. The If a hearing is held, the purpose of the hearing shall be to receive evidence

regarding whether the water appropriated under the permit still provides the beneficial uses for which the permit was granted and whether the permit is still in the public interest. The hearing shall proceed under the rebuttable presumption that the appropriation continues to provide the beneficial uses for which the permit was granted and that the appropriation is in the public interest. After the hearing, the director may by order modify or cancel, in whole or in part, the instream appropriation.

Sec. 14. Section 46-2,136, Reissue Revised Statutes of Nebraska, is amended to read:

46-2,136 The Water Policy Task Force shall discuss the issues described in section 46-2,131 and such related issues as it deems appropriate, shall identify options for resolution of such issues, and shall make recommendations to the Legislature and the Governor relating to any water policy changes the task force deems desirable so long as the task force is authorized by the Legislature.

~~The task force shall complete its work within eighteen months after the Governor notifies the Legislature that all members of the task force have been appointed and a meeting facilitator has been selected.~~

Sec. 15. Section 46-602, Reissue Revised Statutes of Nebraska, as amended by section 2, Legislative Bill 508, Ninety-ninth Legislature, Second Session, 2006, is amended to read:

46-602 (1) Each water well completed in this state on or after July 1, 2001, excluding test holes and dewatering wells to be used for less than ninety days, shall be registered with the Department of Natural Resources as provided in this section within sixty days after completion of construction of the water well. The water well contractor as defined in section 46-1213 constructing the water well, or the owner of the water well if the owner constructed the water well, shall file the registration on a form made available by the department and shall also file with the department the information from the well log required pursuant to section 46-1241. The department shall, by January 1, 2002, provide water well contractors with the option of filing such registration forms electronically. No signature shall be required on forms filed electronically. The fee required by subsection (3) of section 46-1224 shall be the source of funds for any required fee to a contractor which provides the on-line services for such registration. Any discount in the amount paid the state by a credit card, charge card, or debit card company or a third-party merchant bank for such registration fees shall be deducted from the portion of the registration fee collected pursuant to section 46-1224.

(2)(a) If the newly constructed water well is a replacement water well, the registration form shall include (i) the registration number of the water well being replaced, if applicable, and (ii) the date the original water well was decommissioned or a certification that the water well will be decommissioned within one hundred eighty days or a certification that the original water well will be modified and equipped to pump fifty gallons per minute or less and will be used only for livestock, monitoring, observation, or any other nonconsumptive use or de minimus use approved by the applicable natural resources district.

(b) For purposes of this section, replacement water well means a water well which is constructed to provide water for the same purpose as the original water well and is operating in accordance with any applicable permit from the department and any applicable rules and regulations of the natural resources district and, if the purpose is for irrigation, the replacement water well delivers water to the same tract of land served by the original water well and (i) replaces an abandoned water well within three years after the last operation of the abandoned water well and the original water well is decommissioned either before or within one hundred eighty days after such construction, (ii) replaces a water well that has not been abandoned but will not be used after construction of the new water well and the original water well will be decommissioned within one hundred eighty days after such construction, except that in the case of a municipal water well, the original municipal water well may be used after construction of the new water well but shall be decommissioned within one year after completion of the replacement water well, or (iii) will continue to be used but will be modified and equipped within one hundred eighty days after such construction of the replacement water well to pump fifty gallons per minute or less and will be used only for livestock, monitoring, observation, or any other nonconsumptive or de minimus use and approved by the applicable natural resources district.

(c) No water well shall be registered as a replacement water well until the Department of Natural Resources has received a properly completed notice of decommissioning for the water well being replaced on a form made available by the department, or properly completed notice, prepared

in accordance with subsection (7) of this section, of the modification and equipping of the original water well to pump fifty gallons per minute or less for use only for livestock, monitoring, observation, or any other nonconsumptive or de minimus use approved by the applicable natural resources district. Such notices, as required, shall be completed by (i) the water well contractor as defined in section 46-1213 who decommissions the water well or modifies and equips the water well, (ii) the pump installation contractor as defined in section 46-1209 who decommissions the water well or modifies and equips the water well, or (iii) the owner if the owner decommissions a driven sandpoint well which is on land owned by him or her for farming, ranching, or agricultural purposes or as his or her place of abode. The Department of Health and Human Services Regulation and Licensure shall, by rule and regulation, determine which contractor or owner shall be responsible for such notice in situations in which more than one contractor or owner may be required to provide notice under this subsection.

(3) For a series of two or more water wells completed and pumped into a common carrier as part of a single site plan for irrigation purposes, a registration form and a detailed site plan shall be filed for each water well. The registration form shall include the registration numbers of other water wells included in the series if such water wells are already registered.

(4) A series of water wells completed for purposes of installation of a ground heat exchanger for a structure for utilizing the geothermal properties of the ground shall be considered as one water well. One registration form and a detailed site plan shall be filed for each such series.

(5) One registration form shall be required along with a detailed site plan which shows the location of each such water well in the site and a log from each such water well for water wells constructed as part of a single site plan for (a) monitoring ground water, obtaining hydrogeologic information, or extracting contaminants from the ground, (b) water wells constructed as part of remedial action approved by the Department of Environmental Quality pursuant to section 66-1525, 66-1529.02, or 81-15,124, and (c) water well owners who have a permit issued pursuant to the Industrial Ground Water Regulatory Act and also have an underground injection control permit issued by the Department of Environmental Quality.

(6) The Department of Natural Resources shall be notified by the owner of any change in the ownership of a water well required to be registered under this section. Notification shall be in such form and include such evidence of ownership as the Director of Natural Resources by rule and regulation directs. The department shall use such notice to update the registration on file. The department shall not collect a fee for the filing of the notice.

(7) The water well contractor or pump installation contractor responsible therefor shall notify the department within sixty days on a form provided by the department of any pump installation or any modifications to the construction of the water well or pump, after the initial registration of the well. For a change of use resulting in modification and equipping of an original water well which is being replaced in accordance with subsection (2) of this section, the water well contractor or pump installation contractor shall notify the department within sixty days on a form provided by the department of the water well and pump modifications and equipping of the original water well. A water well owner shall notify the department within sixty days on a form provided by the department of any other changes or any inaccuracies in recorded water well information, including, but not limited to, changes in use. The department shall not collect a fee for the filing of the notice.

(8) Whenever a water well becomes an illegal water well as defined in section 46-706, the owner of the water well shall either correct the deficiency that causes the well to be an illegal water well or shall cause the proper decommissioning of the water well in accordance with rules and regulations adopted pursuant to the Water Well Standards and Contractors' Licensing Act. The water well contractor who decommissions the water well, the pump installation contractor who decommissions the water well, or the owner if the owner decommissions a driven sandpoint well which is on land owned by him or her for farming, ranching, or agricultural purposes or as his or her place of abode, shall provide a properly completed notice of abandonment to the Department of Natural Resources within sixty days. The Department of Health and Human Services Regulation and Licensure shall, by rule and regulation, determine which contractor or owner shall be responsible for such notice in situations in which more than one contractor or owner may be required to provide notice under this subsection. The Department of Natural Resources shall not collect a fee for the filing of the notice.

(9) Except for water wells which are used solely for domestic purposes and were constructed before September 9, 1993, and for test holes and dewatering wells used for less than ninety days, each water well which was completed in this state before July 1, 2001, and which is not registered on that date shall be an illegal water well until it is registered with the Department of Natural Resources. Such registration shall be completed by a water well contractor or by the current owner of the water well, shall be on forms provided by the department, and shall provide as much of the information required by subsections (1) through (5) of this section for registration of a new water well as is possible at the time of registration.

(10) Water wells which are or were used solely for injecting any fluid other than water into the underground water reservoir, which were constructed before July 16, 2004, and which have not been properly decommissioned on or before July 16, 2004, shall be registered on or before July 1, 2005.

Sec. 16. Section 46-655.01, Reissue Revised Statutes of Nebraska, is amended to read:

46-655.01 (1) A public water supplier as defined in section 46-638 may obtain protection for a public water supply wellfield from encroachment from other water wells by filing with the Department of Natural Resources a notice of intent to consider a wellfield. The notice of intent shall include:

(a) The legal description of the land being considered as a public water supply wellfield; and

(b) Written consent of the owner of the land considered for a public water supply wellfield, allowing the public water supplier to conduct an evaluation as to whether such land is suitable for a public water supply wellfield.

(2) A notice of intent filed under this section shall be limited to a contiguous tract of land. No public water supplier shall have more than three notices of intent under this section on file with the department at any one time.

(3) A notice of intent filed under this section shall expire one year after the date of filing and may be renewed for one additional year by filing with the department a notice of renewal of the original notice of intent filed under this section before expiration of the original notice of intent.

(4) At the time a notice of intent or a notice of renewal is filed with the department, the public water supplier shall:

(a) Provide a copy of the notice of intent or notice of renewal to the owners of land adjoining the land being considered for a wellfield falling within the spacing protection provided by subdivision (5)(a) of this section pursuant to the notice;

(b) Provide a copy of the notice to the natural resources district or districts within which the land being considered for a wellfield is located; and

(c) Publish a copy of the notice in a newspaper of general circulation in the area in which the wellfield is being considered.

(5)(a) Except as provided in subdivisions (b) and (c) of this subsection, during the time that a notice of intent under this section is in effect, no person may drill or construct a water well, as defined in section 46-601.01, within the following number of feet of the boundaries of the land described in the notice of intent, whichever is greater:

(i) One thousand feet; or

(ii) The maximum number of feet specified in any applicable regulations of a natural resources district that a well of a public water supplier must be spaced from another well.

(b) Any person who, at least one hundred eighty days prior to filing a notice of intent, obtained a valid permit from a natural resources district to drill or construct a water well within the area subject to the protection provided by this section is not prohibited from drilling or constructing a water well.

(c) The public water supplier may waive the protection provided by this section and allow a person to drill or construct a new or replacement water well within the area subject to the protection provided by this section.

(6) Within thirty days after the public water supplier reaches a determination that the land described in a particular notice of intent is not suitable for a public water supply wellfield, the public water supplier shall notify the Department of Natural Resources, all affected natural resources districts, the owner of the land described in the notice of intent, and the owners of the contiguous tracts of land all land falling within the spacing protection provided by subdivision (5)(a) of this section pursuant to the notice of intent of such determination. Upon receipt by the department of

the notice of such determination, the notice of intent that contains the description of such tract of land shall terminate immediately, notwithstanding any other provision of this section.

Sec. 17. Section 46-683, Reissue Revised Statutes of Nebraska, is amended to read:

46-683 (1) The director shall issue a written order containing specific findings of fact either granting or denying a permit. The director shall grant a permit only if he or she finds that the applicant's withdrawal and any transfer of ground water are in the public interest. In determining whether the withdrawal and transfer, if any, are in the public interest, the director's considerations shall include, but not be limited to:

(a) Possible adverse effects on existing surface or ground water users;

(b) The effect of the withdrawal and any transfer of ground water on surface or ground water supplies needed to meet reasonably anticipated domestic and agricultural demands in the area of the proposed ground water withdrawal;

(c) The availability of alternative sources of surface or ground water reasonably accessible to the applicant in or near the region of the proposed withdrawal or use;

(d) The economic benefit of the applicant's proposed use;

(e) The social and economic benefits of existing uses of surface or ground water in the area of the applicant's proposed use and any transfer;

(f) Any waivers of liability from existing users filed with the director;

(g) The effects on interstate compacts or decrees and the fulfillment of the provisions of any other state contract or agreement; and

(h) Other factors reasonably affecting the equity of granting the permit.

(2) The director may grant a permit for less water than requested by the applicant. The director may also impose reasonable conditions on the manner and timing of the ground water withdrawals and on the manner of any transfer of ground water which the director deems necessary to protect existing users of water. The If a hearing is held, the director shall issue such written order within ninety days of the hearing.

Sec. 18. Section 46-691.03, Reissue Revised Statutes of Nebraska, is amended to read:

46-691.03 (1) Any person intending to withdraw ground water from any water well located in the State of Nebraska, transport that water off the overlying land, and use it to augment water supplies in any Nebraska wetland or natural stream for the purpose of benefiting fish or wildlife or producing other environmental or recreational benefits may do so only if the natural resources district in which the water well is or would be located allows withdrawals and transport for such purposes and only after applying for and obtaining a permit from such natural resources district. An application for any such permit shall be accompanied by a nonrefundable fee of fifty dollars payable to such district. Such permit shall be in addition to any permit required pursuant to section 46-252 or 46-735 or subdivision (1)(k) of section 46-739.

(2) Prior to taking action on an application pursuant to this section, the district shall provide an opportunity for public comment on such application at a regular or special board meeting for which advance published notice of the meeting and the agenda therefor have been given consistent with the Open Meetings Act.

(3) In determining whether to grant a permit under this section, the board of directors for the natural resources district shall consider:

(a) Whether the proposed use is a beneficial use of ground water;

(b) The availability to the applicant of alternative sources of surface water or ground water for the proposed withdrawal, transport, and use;

(c) Any negative effect of the proposed withdrawal, transport, and use on ground water supplies needed to meet present or reasonable future demands for water in the area of the proposed withdrawal, transport, and use, to comply with any interstate compact or decree, or to fulfill the provisions of any other formal state contract or agreement;

(d) Any negative effect of the proposed withdrawal, transport, and use on surface water supplies needed to meet present or reasonable future demands for water within the state, to comply with any interstate compact or decree, or to fulfill the provisions of any other formal state contract or agreement;

(e) Any adverse environmental effect of the proposed withdrawal, transport, and use of the ground water;

(f) The cumulative effects of the proposed withdrawal, transport,

and use relative to the matters listed in subdivisions (3)(c) through (e) of this section when considered in conjunction with all other withdrawals, transports, and uses subject to this section;

(g) Whether the proposed withdrawal, transport, and use is consistent with the district's ground water quantity and quality management plan and with any integrated management plan previously adopted or being considered for adoption in accordance with sections 46-713 to 46-719; and

(h) Any other factors consistent with the purposes of this section which the board of directors deems relevant to protect the interests of the state and its citizens.

(4) Issuance of a permit shall be conditioned on the applicant's compliance with the rules and regulations of the natural resources district from which the water is to be withdrawn and, if the location where the water is to be used to produce the intended benefits is in a different natural resources district, with the rules and regulations of that natural resources district. The board of directors may include such reasonable conditions on the proposed withdrawal, transport, and use as it deems necessary to carry out the purposes of this section.

(5) The applicant shall be required to provide access to his or her property at reasonable times for purposes of inspection by officials of any district where the water is to be withdrawn or to be used.

Sec. 19. Section 46-701, Reissue Revised Statutes of Nebraska, is amended to read:

46-701 Sections 46-701 to 46-753 and section 20 of this act shall be known and may be cited as the Nebraska Ground Water Management and Protection Act.

Sec. 20. The Interrelated Water Management Plan Program is created for the purpose of facilitating and funding the duties of districts arising under the Nebraska Ground Water Management and Protection Act. The program shall function as a grant program administered by the Nebraska Natural Resources Commission and the Department of Natural Resources upon recommendations of the commission using funds appropriated for the program. The commission shall develop guidelines and limitations for grant requests for funding such district's duties, including studies required to carry out those duties. Grant requests shall be made to the commission for review in a manner and form prescribed by the commission. The amounts requested and approved shall be supported by a minimum local revenue match comprising twenty percent of the total project cost. The Director of Natural Resources shall expend funds to implement the commission's recommendations for fiscal support under the program only upon the commission's approval.

Sec. 21. Section 46-706, Reissue Revised Statutes of Nebraska, is amended to read:

46-706 For purposes of the Municipal and Rural Domestic Ground Water Transfers Permit Act, the Nebraska Ground Water Management and Protection Act, and sections 46-601 to 46-613.02, 46-636, 46-637, and 46-651 to 46-655, unless the context otherwise requires:

(1) Person means a natural person, a partnership, a limited liability company, an association, a corporation, a municipality, an irrigation district, an agency or a political subdivision of the state, or a department, an agency, or a bureau of the United States;

(2) Ground water means that water which occurs in or moves, seeps, filters, or percolates through ground under the surface of the land;

(3) Contamination or contamination of ground water means nitrate nitrogen or other material which enters the ground water due to action of any person and causes degradation of the quality of ground water sufficient to make such ground water unsuitable for present or reasonably foreseeable beneficial uses;

(4) District means a natural resources district operating pursuant to Chapter 2, article 32;

(5) Illegal water well means (a) any water well operated or constructed without or in violation of a permit required by the Nebraska Ground Water Management and Protection Act, (b) any water well not in compliance with rules and regulations adopted and promulgated pursuant to the act, (c) any water well not properly registered in accordance with sections 46-602 to 46-604, or (d) any water well not in compliance with any other applicable laws of the State of Nebraska or with rules and regulations adopted and promulgated pursuant to such laws;

(6) To commence construction of a water well means the beginning of the boring, drilling, jetting, digging, or excavating of the actual water well from which ground water is to be withdrawn;

(7) Management area means any area so designated by a district pursuant to section 46-712 or 46-718, by the Director of Environmental Quality

pursuant to section 46-725, or by the Interrelated Water Review Board pursuant to section 46-719. Management area includes a control area or a special ground water quality protection area designated prior to July 19, 1996;

(8) Management plan means a ground water management plan developed by a district and submitted to the Director of Natural Resources for review pursuant to section 46-711;

(9) Ground water reservoir life goal means the finite or infinite period of time which a district establishes as its goal for maintenance of the supply and quality of water in a ground water reservoir at the time a ground water management plan is adopted;

(10) Board means the board of directors of a district;

(11) Acre-inch means the amount of water necessary to cover an acre of land one inch deep;

(12) Subirrigation or subirrigated land means the natural occurrence of a ground water table within the root zone of agricultural vegetation, not exceeding ten feet below the surface of the ground;

(13) Best management practices means schedules of activities, maintenance procedures, and other management practices utilized for purposes of irrigation efficiency, to conserve or effect a savings of ground water, or to prevent or reduce present and future contamination of ground water. Best management practices relating to contamination of ground water which may include, but not be limited to, irrigation scheduling, proper rate and timing of fertilizer application, and other fertilizer and pesticide management programs. In determining the rate of fertilizer application, the district shall consult with the University of Nebraska or a certified crop advisor certified by the American Society of Agronomy;

(14) Point source means any discernible, confined, and discrete conveyance, including, but not limited to, any pipe, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, vessel, other floating craft, or other conveyance, over which the Department of Environmental Quality has regulatory authority and from which a substance which can cause or contribute to contamination of ground water is or may be discharged;

(15) Allocation, as it relates to water use for irrigation purposes, means the allotment of a specified total number of acre-inches of irrigation water per irrigated acre per year or an average number of acre-inches of irrigation water per irrigated acre over any reasonable period of time;

(16) Rotation means a recurring series of use and nonuse of irrigation wells on an hourly, daily, weekly, monthly, or yearly basis;

(17) Water well has the same meaning as in section 46-601.01;

(18) Surface water project sponsor means an irrigation district created pursuant to Chapter 46, article 1, a reclamation district created pursuant to Chapter 46, article 5, or a public power and irrigation district created pursuant to Chapter 70, article 6;

(19) Beneficial use means that use by which water may be put to use to the benefit of humans or other species;

(20) Consumptive use means the amount of water that is consumed under appropriate and reasonably efficient practices to accomplish without waste the purposes for which the appropriation or other legally permitted use is lawfully made;

(21) Dewatering well means a well constructed and used solely for the purpose of lowering the ground water table elevation;

(22) Emergency situation means any set of circumstances that requires the use of water from any source that might otherwise be regulated or prohibited and the agency, district, or organization responsible for regulating water use from such source reasonably and in good faith believes that such use is necessary to protect the public health, safety, and welfare, including, if applicable, compliance with federal or state water quality standards;

(23) Good cause shown means a reasonable justification for granting a variance for a consumptive use of water that would otherwise be prohibited by rule or regulation and which the granting agency, district, or organization reasonably and in good faith believes will provide an economic, environmental, social, or public health and safety benefit that is equal to or greater than the benefit resulting from the rule or regulation from which a variance is sought;

(24) Historic consumptive use means the amount of water that has previously been consumed under appropriate and reasonably efficient practices to accomplish without waste the purposes for which the appropriation or other legally permitted use was lawfully made;

(25) Monitoring well means a water well that is designed and constructed to provide ongoing hydrologic or water quality information and is not intended for consumptive use;

(26) Order, except as otherwise specifically provided, includes any order required by the Nebraska Ground Water Management and Protection Act, by rule or regulation, or by a decision adopted by a district by vote of the board of directors of the district taken at any regularly scheduled or specially scheduled meeting of the board;

(27) Overall difference between the current and fully appropriated levels of development means the extent to which existing uses of hydrologically connected surface water and ground water and conservation activities result in the water supply available for purposes identified in subsection (3) of section 46-713 to be less than the water supply available if the river basin, subbasin, or reach had been determined to be fully appropriated in accordance with section 46-714;

(28) Test hole means a hole designed solely for the purposes of obtaining information on hydrologic or geologic conditions; and

(29) Variance means (a) an approval to deviate from a restriction imposed under subsection (1), (2), (9), or (10) of section 46-714 or (b) the approval to act in a manner contrary to existing rules or regulations from a governing body whose rule or regulation is otherwise applicable.

Sec. 22. Section 46-712, Reissue Revised Statutes of Nebraska, is amended to read:

46-712 (1) A natural resources district may establish a ground water management area in accordance with this section to accomplish any one or more of the following objectives: (a) Protection of ground water quantity; (b) protection of ground water quality; or (c) prevention or resolution of conflicts between users of ground water and appropriators of surface water, which ground water and surface water are hydrologically connected.

(2) Prior to establishment by a district of a management area other than a management area being established in accordance with section 46-718, the district's management plan shall have been approved by the Director of Natural Resources or the district shall have completed the requirements of subsection (2) of section 46-711. If necessary to determine whether a management area should be designated, the district may initiate new studies and data-collection efforts and develop computer models. In order to establish a management area, the district shall fix a time and place for a public hearing to consider the management plan information supplied by the director and to hear any other evidence. The hearing shall be located within or in reasonable proximity to the area proposed for designation as a management area. Notice of the hearing shall be published as provided in section 46-743, and the hearing shall be conducted in accordance with such section.

(3)(a) Within ninety days after the hearing, the district shall determine whether a management area shall be designated. If the district determines that no management area shall be established, the district shall issue an order to that effect.

(b) If the district determines that a management area shall be established, the district shall by order designate the area as a management area and shall adopt one or more controls authorized by section 46-739 to be utilized within the area in order to achieve the ground water management objectives specified in the plan. Such an order shall include a geographic and stratigraphic definition of the area. The boundaries and controls shall take into account any considerations brought forth at the hearing and administrative factors directly affecting the ability of the district to implement and carry out local ground water management.

(c) The controls adopted shall not include controls substantially different from those set forth in the notice of the hearing. The area designated by the order shall not include any area not included in the notice of the hearing.

(4) Modification of the boundaries of a district-designated management area or dissolution of such an area shall be in accordance with the procedures established in this section. Hearings for such modifications or for dissolution may not be initiated more often than once a year. Hearings for modification of controls may be initiated as often as deemed necessary by the district, and such modifications may be accomplished using the procedure in this section.

(5) A district shall, prior to adopting or amending any rules or regulations for a management area, consult with any holders of permits for intentional or incidental underground water storage and recovery issued pursuant to section 46-226.02, 46-233, 46-240, 46-241, 46-242, or 46-297.

(6) If a ground water management area has been adopted by a district under this section that includes one or more controls authorized by subdivision (1)(f) or (1)(m) of section 46-739, the district may request the Department of Natural Resources to conduct an evaluation to determine if an immediate stay should be placed on the issuance of new surface water

natural-flow appropriations in the area, river basin, subbasin, or reach of the management area, and the department may determine that the stay is in the public interest. The stay may include provisions for exceptions to be granted for beneficial uses as described in subsection (3) of section 46-714 or for a project that provides hydrological benefit to the area of the stay and may include provisions that the stay may be rescinded based on new or additional information that may become available.

Sec. 23. Section 46-713, Reissue Revised Statutes of Nebraska, is amended to read:

46-713 (1) (a) By January 1 of each year beginning in 2006 and except as otherwise provided in this section and section 46-720, the Department of Natural Resources shall complete an evaluation of the expected long-term availability of hydrologically connected water supplies for both existing and new surface water uses and existing and new ground water uses in each of the state's river basins and shall issue a report that describes the results of the evaluation. For purposes of the evaluation and the report, a river basin may be divided into two or more subbasins or reaches. A river basin, subbasin, or reach for which an integrated management plan has been or is being developed pursuant to sections 46-715 to 46-717 or pursuant to section 46-719 shall not be evaluated unless it is being reevaluated as provided in subsection (2) of this section. For each river basin, subbasin, or reach evaluated, the report shall describe (i) the nature and extent of use of both surface water and ground water in each river basin, subbasin, or reach, (ii) the geographic area within which the department preliminarily considers surface water and ground water to be hydrologically connected and the criteria used for that determination, and (iii) the extent to which the then-current uses affect available near-term and long-term water supplies. River basins, subbasins, and reaches designated as overappropriated in accordance with subsection (4) of this section shall not be evaluated by the department.

(b) Based on the information reviewed in the evaluation process, the department shall arrive at a preliminary conclusion for each river basin, subbasin, and reach evaluated as to whether such river basin, subbasin, or reach presently is fully appropriated without the initiation of additional uses. The department shall also determine if and how such preliminary conclusion would change if no additional legal constraints were imposed on future development of hydrologically connected surface water and ground water and reasonable projections are made about the extent and location of future development in such river basin, subbasin, or reach.

(c) In addition to the conclusion about whether a river basin, subbasin, or reach is fully appropriated, the department shall include in the report, for informational purposes only, a summary of relevant data provided by any interested party concerning the social, economic, and environmental impacts of additional hydrologically connected surface water and ground water uses on resources that are dependent on streamflow or ground water levels but are not protected by appropriations or regulations.

(d) In preparing the report, the department shall rely on the best scientific data, and information, and methodologies readily available to ensure that the conclusions and results contained in the report are reliable. In its report, the department shall provide sufficient documentation to allow these data, information, methodologies, and conclusions to be independently replicated and assessed. Upon request by the department, state agencies, natural resources districts, irrigation districts, reclamation districts, public power and irrigation districts, mutual irrigation companies, canal companies, municipalities, and other water users and stakeholders shall provide relevant data and information in their possession. The Department of Natural Resources shall specify by rule and regulation the types of scientific data and other information that will be considered for making the preliminary determinations required by this section.

(2) The department shall complete a reevaluation of a river basin, subbasin, or reach for which an integrated management plan has been or is being prepared if the department has reason to believe that a reevaluation might lead to a different determination about whether such river basin, subbasin, or reach is fully appropriated or overappropriated. A decision to reevaluate may be reached by the department on its own or in response to a petition filed with the department by any interested person. To be considered sufficient to justify a reevaluation, a petition shall be accompanied by supporting information showing that (a) new scientific data or other information relevant to the determination of whether the river basin, subbasin, or reach is fully appropriated or overappropriated has become available since the last evaluation of such river basin, subbasin, or reach, (b) the department relied on incorrect or incomplete information when the river basin, subbasin, or reach was last evaluated, or (c) the department

erred in its interpretation or application of the information available when the river basin, subbasin, or reach was last evaluated. If a petition determined by the department to be sufficient is filed before March 1 of any year, the reevaluation of the river basin, subbasin, or reach involved shall be included in the next annual report prepared in accordance with subsection (1) of this section. If any such petition is filed on or after March 1 of any year, the department may defer the reevaluation of the river basin, subbasin, or reach involved until the second annual report after such filing.

(3) A river basin, subbasin, or reach shall be deemed fully appropriated if the department determines based upon its evaluation conducted pursuant to subsection (1) of this section and information presented at the hearing pursuant to subsection (4) of section 46-714 that then-current uses of hydrologically connected surface water and ground water in the river basin, subbasin, or reach cause or will in the reasonably foreseeable future cause (a) the surface water supply to be insufficient to sustain over the long term the beneficial or useful purposes for which existing ~~natural flow~~ natural-flow or storage appropriations were granted and the beneficial or useful purposes for which, at the time of approval, any existing instream appropriation was granted, (b) the streamflow to be insufficient to sustain over the long term the beneficial uses from wells constructed in aquifers dependent on recharge from the river or stream involved, or (c) reduction in the flow of a river or stream sufficient to cause noncompliance by Nebraska with an interstate compact or decree, other formal state contract or agreement, or applicable state or federal laws.

(4)(a) A river basin, subbasin, or reach shall be deemed overappropriated if, on July 16, 2004, the river basin, subbasin, or reach is subject to an interstate cooperative agreement among three or more states and if, prior to such date, the department has declared a moratorium on the issuance of new surface water appropriations in such river basin, subbasin, or reach and has requested each natural resources district with jurisdiction in the affected area in such river basin, subbasin, or reach either (i) to close or to continue in effect a previously adopted closure of all or part of such river basin, subbasin, or reach to the issuance of additional water well permits in accordance with subdivision (1)(k) of section 46-656.25 as such section existed prior to July 16, 2004, or (ii) to temporarily suspend or to continue in effect a temporary suspension, previously adopted pursuant to section 46-656.28 as such section existed prior to July 16, 2004, on the drilling of new water wells in all or part of such river basin, subbasin, or reach.

(b) Within sixty days after July 16, 2004, the department shall designate which river basins, subbasins, or reaches are overappropriated. The designation shall include a description of the geographic area within which the department has determined that surface water and ground water are hydrologically connected and the criteria used to make such determination.

Sec. 24. Section 46-714, Reissue Revised Statutes of Nebraska, is amended to read:

46-714 (1) Whenever the Department of Natural Resources makes a preliminary determination that a river basin, subbasin, or reach not previously designated as overappropriated and not previously determined to be fully appropriated has become fully appropriated, the department shall place an immediate stay on the issuance of any new natural-flow, storage, or storage-use appropriations in such river basin, subbasin, or reach. The department shall also provide prompt notice of such preliminary determination to all licensed water well contractors in the state and to each natural resources district that encompasses any of the geographic area involved. Such notice to natural resources districts shall be by certified mail. The notice shall be addressed to the manager of the natural resources district or his or her designee and shall include the signature of the Director of Natural Resources. Immediately upon receipt of such notice by the natural resources district, there shall be a stay on issuance of water well construction permits in the geographic area preliminarily determined by the department to include hydrologically connected surface water and ground water in such river basin, subbasin, or reach. The department shall also notify the public of the preliminary determination that the river basin, subbasin, or reach is fully appropriated and of the affected geographic area. Such notice shall be provided by publication once each week for three consecutive weeks in at least one newspaper of statewide circulation and in such other newspaper or newspapers as are deemed appropriate by the department to provide general circulation in the river basin, subbasin, or reach.

(2) If the department preliminarily determines a river basin, subbasin, or reach to be fully appropriated and has identified the existence of hydrologically connected surface water and ground water in such river

basin, subbasin, or reach, stays shall also be imposed:

(a) ~~en~~ On the construction of any new water well in the area covered by the determination if such construction has not commenced unless a permit with conditions imposed by the natural resources district has been issued prior to the determination. Such conditions shall meet the objectives of subsection (3) of section 46-715 and may include, but are not limited to, conditions in accordance with subsection (6) of section 46-739. Any well constructed pursuant to such permit shall be completed in accordance with section 46-738; whether or not a construction permit for such water well was previously obtained from the department or a natural resources district, and

(b) ~~en~~ On the use of an existing water well or an existing surface water appropriation in the affected area to increase the number of acres historically irrigated.

Such additional stays shall begin ten days after the first publication, in a newspaper of statewide circulation, of the notice of the preliminary determination that the river basin, subbasin, or reach is fully appropriated.

(3) Exceptions to the stays imposed pursuant to subsection (1), (2), (9), or (10) of this section shall exist for (a) test holes, (b) dewatering wells with an intended use of one year or less, (c) monitoring wells, (d) wells constructed pursuant to a ground water remediation plan under the Environmental Protection Act, (e) water wells designed and constructed to pump fifty gallons per minute or less, except that no two or more water wells that each pump fifty gallons per minute or less may be connected or otherwise combined to serve a single project such that the collective pumping would exceed fifty gallons per minute, (f) water wells for range livestock, (g) new surface water uses or water wells that are necessary to alleviate an emergency situation involving the provision of water for human consumption or public health and safety, (h) water wells defined by the applicable natural resources district as replacement water wells, but the consumptive use of any such replacement water well can be no greater than the historic consumptive use of the water well it is to replace or, if applicable, the historic consumptive use of the surface water use it is to replace, (i) new surface water uses and water wells to which a right or permit is transferred in accordance with state law, but the consumptive use of any such new use can be no greater than the historic consumptive use of the surface water use or water well from which the right or permit is being transferred, (j) water wells and increases in ground water irrigated acres for which a variance is granted by the applicable natural resources district for good cause shown, (k) to the extent permitted subject to any conditions imposed by the applicable natural resources district, to the extent permitted by the applicable natural resources district, increases in ground water irrigated acres that result from the use of water wells that were ~~constructed within the nine months prior to the effective date of the stay permitted prior to the effective date of the determination made in subsection (1) of this section and completed in accordance with section 46-738~~ but were not used for irrigation prior to that effective date, (l) to the extent permitted by the applicable natural resources district, increases in ground water irrigated acres that result from the use of water wells that are constructed after the effective date of the stay in accordance with a permit granted by that natural resources district prior to the effective date of the stay, (m) surface water uses for which temporary public-use construction permits are issued pursuant to subsection (8) of section 46-233, (n) surface water uses and increases in surface water irrigated acres for which a variance is granted by the department for good cause shown, and (o) water wells for which permits have been approved by the Department of Natural Resources pursuant to the Municipal and Rural Domestic Ground Water Transfers Permit Act prior to the effective date of the stay.

(4) Except as otherwise provided in this section, any stay imposed pursuant to subsections (1) and (2) of this section shall remain in effect for the affected river basin, subbasin, or reach until the department has made a final determination regarding whether the river basin, subbasin, or reach is fully appropriated and, if the department's final determination is that the river basin, subbasin, or reach is fully appropriated, shall remain in effect as provided in subsection (12) of this section. Within the time period between the dates of the preliminary and final determinations, the department and the affected natural resources districts shall consult with any irrigation district, reclamation district, public power and irrigation district, mutual irrigation company, canal company, or municipality that relies on water from the affected river basin, subbasin, or reach and with other water users and stakeholders as deemed appropriate by the department or the natural resources districts. The department shall also hold one or more public hearings not more than ninety days after the first publication of the notice required by

subsection (1) of this section. Notice of the hearings shall be provided in the same manner as the notice required by such subsection. Any interested person may appear at such hearing and present written or oral testimony and evidence concerning the appropriation status of the river basin, subbasin, or reach, the department's preliminary conclusions about the extent of the area within which the surface water and ground water supplies for the river basin, subbasin, or reach are determined to be hydrologically connected, and whether the stays on new uses should be terminated.

(5) Within thirty days after the final hearing under subsection (4) of this section, the department shall notify the appropriate natural resources districts of the department's final determination with respect to the appropriation status of the river basin, subbasin, or reach. If the final determination is that the river basin, subbasin, or reach is fully appropriated, the department, at the same time, shall (a) decide whether to continue or to terminate the stays on new surface water uses and on increases in the number of surface water irrigated acres and (b) designate the geographic area within which the department considers surface water and ground water to be hydrologically connected in the river basin, subbasin, or reach and describe the methods and criteria used in making that determination. The department shall provide notice of its decision to continue or terminate the stays in the same manner as the notice required by subsection (1) of this section.

(6) If the department's final determination is that the river basin, subbasin, or reach is not fully appropriated, the department shall provide notice of such determination as provided in subsection (1) of this section, the stays imposed pursuant to subsections (1) and (2) of this section shall terminate immediately, and no further action pursuant to subsections (7) through (12) of this section and sections 46-715 to 46-719 shall be required.

(7) Within ninety days after a final determination by the department that a river basin, subbasin, or reach is fully appropriated, an affected natural resources district may hold one or more public hearings on the question of whether the stays on the issuance of new water well permits, on the construction of new water wells, or on increases in ground water irrigated acres should be terminated. Notice of the hearings shall be published as provided in section 46-743.

(8) Within forty-five days after a natural resources district's final hearing pursuant to subsection (7) of this section, the natural resources district shall decide (a) whether to terminate the stay on new water wells in all or part of the natural resources district subject to the stay and (b) whether to terminate the stay on increases in ground water irrigated acres. If the natural resources district decides not to terminate the stay on new water wells in any geographic area, it shall also decide whether to exempt from such stay the construction of water wells for which permits were issued prior to the issuance of the stay but for which construction had not begun prior to issuance of the stay. If construction of water wells for which permits were issued prior to the stay is allowed, all permits that were valid when the stay went into effect shall be extended by a time period equal to the length of the stay.

(9) Whenever the department designates a river basin, subbasin, or reach as overappropriated, each previously declared moratorium on the issuance of new surface water appropriations in the river basin, subbasin, or reach shall continue in effect. The department shall also provide prompt notice of such designation to all licensed water well contractors in the state and to each natural resources district that encompasses any of the geographic area involved. Immediately upon receipt of such notice by a natural resources district, there shall be a stay on the issuance of new water well construction permits in any portion of such natural resources district that is within the hydrologically connected area designated by the department. The department shall also notify the public of its designation of such river basin, subbasin, or reach as overappropriated and of the geographic area involved in such designation. Such notice shall be published once each week for three consecutive weeks in at least one newspaper of statewide circulation and in such other newspapers as are deemed appropriate by the department to provide general notice in the river basin, subbasin, or reach.

(10) Beginning ten days after the first publication of notice under subsection (9) of this section in a newspaper of statewide circulation, there shall also be stays (a) on the construction of any new water well in the hydrologically connected area if such construction has not commenced prior to such date and if no permit for construction of the water well has been issued previously by either the department or the natural resources district, (b) on the use of an existing water well in the hydrologically connected area to increase the number of acres historically irrigated, and (c) on the use

of an existing surface water appropriation to increase the number of acres historically irrigated in the affected area.

(11) Within ninety days after a designation by the department of a river basin, subbasin, or reach as overappropriated, a natural resources district that encompasses any of the hydrologically connected area designated by the department may hold one or more public hearings on the question of whether to terminate the stays on (a) the construction of new water wells within all or part of its portion of the hydrologically connected area, (b) the issuance of new water well construction permits in such area, or (c) the increase in ground water irrigated acres in such area. Notice of any hearing for such purpose shall be provided pursuant to section 46-743. Prior to the scheduling of a natural resources district hearing on the question of whether to terminate any such stay, the department and the affected natural resources district shall consult with any irrigation district, reclamation district, public power and irrigation district, mutual irrigation company, canal company, or municipality that relies on water from the affected river basin, subbasin, or reach and with other water users and stakeholders as deemed appropriate by the department or the natural resources district.

(12) Any stay issued pursuant to this section shall remain in effect until (a) the stay has been terminated pursuant to subsection (5), (6), (8), or (11) of this section, (b) an integrated management plan for the affected river basin, subbasin, or reach has been adopted by the department and the affected natural resources districts and has taken effect, (c) an integrated management plan for the affected river basin, subbasin, or reach has been adopted by the Interrelated Water Review Board and has taken effect, (d) the department has completed a reevaluation pursuant to subsection (2) of section 46-713 and has determined that the affected river basin, subbasin, or reach is not fully appropriated or overappropriated, or (e) the stay expires pursuant to this subsection. Such stay may be imposed initially for not more than three years following the department's designation of the river basin, subbasin, or reach as overappropriated or the department's final determination that a river basin, subbasin, or reach is fully appropriated and may be extended thereafter on an annual basis by agreement of the department and the affected natural resources district for not more than two additional years if necessary to allow the development, adoption, and implementation of an integrated management plan pursuant to sections 46-715 to 46-719.

Sec. 25. Section 46-715, Reissue Revised Statutes of Nebraska, is amended to read:

46-715 (1) Whenever the Department of Natural Resources has designated a river basin, subbasin, or reach as overappropriated or has made a final determination that a river basin, subbasin, or reach is fully appropriated, the natural resources districts encompassing such river basin, subbasin, or reach and the department shall jointly develop an integrated management plan for such river basin, subbasin, or reach. The plan shall be completed, adopted, and take effect within three years after such designation or final determination unless the department and the natural resources districts jointly agree to an extension of not more than two additional years.

(2) In developing an integrated management plan, the effects of existing and potential new water uses on existing surface water appropriators and ground water users shall be considered. An integrated management plan shall include the following: (a) Clear goals and objectives with a purpose of sustaining a balance between water uses and water supplies so that the economic viability, social and environmental health, safety, and welfare of the river basin, subbasin, or reach can be achieved and maintained for both the near term and the long term; (b) a map clearly delineating the geographic area subject to the integrated management plan; (c) one or more of the ground water controls authorized for adoption by natural resources districts pursuant to section 46-739; ~~and~~ (d) one or more of the surface water controls authorized for adoption by the department pursuant to section 46-716; and (e) a plan to gather and evaluate data, information, and methodologies that could be used to implement sections 46-715 to 46-717, increase understanding of the surface water and hydrologically connected ground water system, and test the validity of the conclusions and information upon which the integrated management plan is based. The plan may also provide for utilization of any applicable incentive programs authorized by law. Nothing in the integrated management plan for a fully appropriated river basin, subbasin, or reach shall require a natural resources district to regulate ground water uses in place at the time of the department's preliminary determination that the river basin, subbasin, or reach is fully appropriated, but a natural resources district may voluntarily adopt such regulations. The applicable natural resources district may decide to include all water users within the district boundary in an integrated management plan.

(3) The ground water and surface water controls proposed for adoption in the integrated management plan pursuant to subsection (1) of this section shall, when considered together and with any applicable incentive programs, (a) be consistent with the goals and objectives of the plan, (b) be sufficient to ensure that the state will remain in compliance with applicable state and federal laws and with any applicable interstate water compact or decree or other formal state contract or agreement pertaining to surface water or ground water use or supplies, and (c) protect the ground water users whose water wells are dependent on recharge from the river or stream involved and the surface water appropriators on such river or stream from streamflow depletion caused by surface water uses and ground water uses begun after the date the river basin, subbasin, or reach was designated as overappropriated or was preliminarily determined to be fully appropriated in accordance with section 46-713.

(4) (a) In any river basin, subbasin, or reach that is designated as overappropriated, when the designated area lies within two or more natural resources districts, the department and the affected natural resources districts shall jointly develop a basin-wide plan for the area designated as overappropriated. Such plan shall be developed using the consultation and collaboration process described in subdivision (b) of this subsection, shall be developed concurrently with the development of the integrated management plan required pursuant to subsections (1) through (3) of this section, and shall be designed to achieve, in the incremental manner described in subdivision (d) of this subsection, the goals and objectives described in subsection (2) of this section. The basin-wide plan shall be adopted after hearings by the department and the affected natural resources districts.

(b) In any river basin, subbasin, or reach designated as overappropriated and subject to this subsection, the department and each natural resources district encompassing such river basin, subbasin, or reach shall jointly develop an integrated management plan for such river basin, subbasin, or reach pursuant to subsections (1) through (3) of this section. Each integrated management plan for a river basin, subbasin, or reach subject to this subsection shall be consistent with any basin-wide plan developed pursuant to subdivision (a) of this subsection. Such integrated management plan shall be developed after consultation and collaboration with irrigation districts, reclamation districts, public power and irrigation districts, mutual irrigation companies, canal companies, and municipalities that rely on water from within the affected area and that, after being notified of the commencement of the plan development process, indicate in writing their desire to participate in such process. In addition, the department or the affected natural resources districts may include designated representatives of other stakeholders. If agreement is reached by all parties involved in such consultation and collaboration process, the department and each natural resources district shall adopt the agreed-upon integrated management plan. If agreement cannot be reached by all parties involved, the integrated management plan shall be developed and adopted by the department and the affected natural resources district pursuant to sections 46-715 to 46-718 or by the Interrelated Water Review Board pursuant to section 46-719.

(c) Any integrated management plan developed under this subsection shall identify the overall difference between the current and fully appropriated levels of development. Such determination shall take into account cyclical supply, including drought, identify the portion of the overall difference between the current and fully appropriated levels of development that is due to conservation measures, and identify the portions of the overall difference between the current and fully appropriated levels of development that are due to water use initiated prior to July 1, 1997, and to water use initiated on or after such date.

(d) Any integrated management plan developed under this subsection shall adopt an incremental approach to achieve the goals and objectives identified under subdivision (2)(a) of this section using the following steps:

(i) The first incremental goals shall be to address the impact of streamflow depletions to (A) surface water appropriations and (B) water wells constructed in aquifers dependent upon recharge from streamflow, to the extent those depletions are due to water use initiated after July 1, 1997, and, unless an interstate cooperative agreement for such river basin, subbasin, or reach is no longer in effect, to prevent streamflow depletions that would cause noncompliance by Nebraska with such interstate cooperative agreement. During the first increment, the department and the affected natural resources districts shall also pursue voluntary efforts, subject to the availability of funds, to offset any increase in streamflow depletive effects that occur after July 1, 1997, but are caused by ground water uses initiated prior to such date. The department and the affected natural resources districts may also use

other appropriate and authorized measures for such purpose;

(ii) The department and the affected natural resources districts may amend an integrated management plan subject to this subsection (4) as necessary based on an annual review of the progress being made toward achieving the goals for that increment;

(iii) During the ten years following adoption of an integrated management plan developed under this subsection (4) or during the ten years after the adoption of any subsequent increment of the integrated management plan pursuant to subdivision (d)(iv) of this subsection, the department and the affected natural resources district shall conduct a technical analysis of the actions taken in such increment to determine the progress towards meeting the goals and objectives adopted pursuant to subsection (2) of this section. The analysis shall include an examination of (A) available supplies and changes in long-term availability, (B) the effects of conservation practices and natural causes, including, but not limited to, drought, and (C) the effects of the plan on reducing the overall difference between the current and fully appropriated levels of development identified in subdivision (4)(c) of this section. The analysis shall determine whether a subsequent increment is necessary in the integrated management plan to meet the goals and objectives adopted pursuant to subsection (2) of this section and reduce the overall difference between the current and fully appropriated levels of development identified in subdivision (4)(c) of this section;

(iv) Based on the determination made in subdivision (d)(iii) of this subsection, the department and the affected natural resources districts, utilizing the consultative and collaborative process described in subdivision (b) of this subsection, shall if necessary identify goals for a subsequent increment of the integrated management plan. Subsequent increments shall be completed, adopted, and take effect not more than ten years after adoption of the previous increment; and

(v) If necessary, the steps described in subdivisions (d)(ii) through (iv) of this subsection shall be repeated until the department and the affected natural resources districts agree that the goals and objectives identified pursuant to subsection (2) of this section have been met and the overall difference between the current and fully appropriated levels of development identified in subdivision (4)(c) of this section has been addressed so that the river basin, subbasin, or reach has returned to a fully appropriated condition.

Sec. 26. Section 46-719, Reissue Revised Statutes of Nebraska, is amended to read:

46-719 (1)(a) The Interrelated Water Review Board is created for the purposes stated in subsections (2) through (5) of this section. The board shall consist of five members. The board, when appointed and convened, shall continue in existence only until it has resolved a dispute referred to it pursuant to such subsections. The Governor shall appoint and convene the board within forty-five days of being notified of the need to resolve a dispute. The board shall be chaired by the Governor or his or her designee, which designee shall be knowledgeable concerning surface water and ground water issues. The Governor shall appoint one additional member of his or her choosing and shall appoint the other three members of the board from a list of no fewer than six nominees provided by the Nebraska Natural Resources Commission within twenty days after request by the Governor for a list of nominees.

(b) Not more than two members of the board shall reside in the geographic area involved in the dispute. A person is not eligible for membership on the board if the decisions to be made by the board would or could cause financial benefit or detriment to the person, a member of his or her immediate family, or a business with which the person is associated, unless such benefit or detriment is indistinguishable from the effects of such action on the public generally or a broad segment of the public. The board shall be subject to the Open Meetings Act.

(c) For purposes of subsections (2) and (3) of this section, action may be taken by a vote of three of the board's five members. For purposes of subsections (4) and (5) of this section, action may be taken only by a vote of at least four of the board's five members.

(2)(a) If the Department of Natural Resources and the affected natural resources districts cannot resolve disputes over the content of a basin-wide plan or an integrated management plan by utilizing the process described in sections 46-715 to 46-718, the Governor shall be notified and the dispute submitted to the Interrelated Water Review Board. When the board has been appointed and convened to resolve disputes over a basin-wide plan, the department and each affected district shall present their proposed basin-wide plans to the board. When the board has been convened to resolve disputes over an integrated management plan, the department and each affected natural

resources district shall present their (i) proposed goals and objectives for the integrated management plan, (ii) proposed geographic area to be subject to controls, and (iii) proposed surface water and ground water controls and any proposed incentive program for adoption and implementation in the river basin, subbasin, or reach involved. The department and each affected natural resources district shall also be given adequate opportunity to comment on the proposals made by the other parties to the dispute.

(b) When the Interrelated Water Review Board concludes that the issues in dispute have been fully presented and commented upon by the parties to the dispute, which conclusion shall be made not more than forty-five days after the board is convened, the board shall select the proposals or portions of proposals that the board will consider for adoption and shall schedule one or more public hearings to take testimony on the selected proposals. The hearings shall be held within forty-five days after the board's selection of proposals to consider for adoption and shall be within or in reasonable proximity to the area that would be affected by implementation of any of the proposals to be considered at the hearings. Notice of the hearings shall be published as provided in section 46-743. The cost of publishing the notice shall be shared by the department and the affected natural resources districts. All interested persons may appear at the hearings and present testimony or provide other evidence relevant to the issues being considered.

(c) Within forty-five days after the final hearing pursuant to subdivision (b) of this subsection, the Interrelated Water Review Board shall by order, as applicable, adopt a basin-wide plan or an integrated management plan for the affected river basin, subbasin, or reach and, in the case of an integrated management plan, shall designate a ground water management ~~plan~~ area for integrated management or an integrated management subarea for such river basin, subbasin, or reach. An integrated management plan shall be consistent with subsection (2) of section 46-715, and the surface water and ground water controls and any applicable incentive programs adopted as part of that plan shall be consistent with subsection (3) of section 46-715. The controls adopted by the board shall not be substantially different from those described in the notice of hearing. The area designated as a ground water management area or an integrated management subarea shall not include any area that was not identified in the notice of the hearing as within the area proposed to be subject to the controls in the plan.

(d) The order adopted under this subsection shall be published in the manner prescribed in section 46-744.

(e) Surface water controls adopted by the Interrelated Water Review Board shall be implemented and enforced by the department. Ground water controls adopted by the Interrelated Water Review Board shall be implemented and enforced by the affected natural resources districts.

(3) Whether an integrated management plan is adopted pursuant to section 46-718 or by the Interrelated Water Review Board pursuant to subsection (2) of this section, the department or a natural resources district responsible in part for implementation and enforcement of an integrated management plan may propose modification of the goals or objectives of that plan, of the area subject to the plan, or of the surface water controls, ground water controls, or incentive programs adopted to implement the plan. The department and the affected natural resources districts shall utilize the procedures in sections 46-715 to 46-718 in an attempt to reach agreement on and to adopt and implement proposed modifications. If agreement on such modifications cannot be achieved utilizing those procedures, either the department or an affected natural resources district may notify the Governor of the dispute. The Interrelated Water Review Board shall be appointed and convened in accordance with subsection (1) of this section to resolve the dispute and, if applicable, to adopt any modifications utilizing the procedures in subsection (2) of this section.

(4) The department and the affected natural resources districts may also raise objections concerning the implementation or enforcement of previously adopted surface water or ground water controls. The department and the affected natural resources districts shall utilize the procedures in sections 46-715 to 46-718 in an attempt to reach agreement on such implementation or enforcement issues. If agreement on such issues cannot be achieved utilizing such procedures, either the department or an affected natural resources district may notify the Governor of the dispute. The Interrelated Water Review Board shall be appointed and convened in accordance with subsection (1) of this section. After permitting each party to fully express its reasons for its position on the disputed issues, the board may either take no action or conclude (a) that one or more parties needs to modify its approach to implementation or enforcement and direct that such modifications take place or (b) that one or more parties either has not made a

good faith effort to implement or enforce the portion of the plan or controls for which it is responsible or is unable to fully implement and enforce such portion and that such party's jurisdiction with respect to implementation and enforcement of the plan and controls shall be terminated and reassigned to one or more of the other parties responsible for implementation and enforcement. A decision by the Interrelated Water Review Board to terminate and reassign jurisdiction of any portion of the plan or controls shall take effect immediately upon that decision. Notice of such reassignment shall be published at least once in one or more newspapers as necessary to provide general circulation in the area affected by such reassignment.

(5) The board may be reconvened in accordance with subsection (1) of this section at a later date upon request to the Governor by the party for which jurisdiction for implementation and enforcement was terminated if such party desires to have its jurisdiction reinstated, but no such request shall be honored until at least one year after the termination and not more than once per year thereafter. The board may reinstate jurisdiction to that party only upon a clear showing by such party that it is willing and able to fully implement and enforce the plan and any applicable controls. Notice that a party's jurisdiction has been reinstated shall be provided in the same manner that notice of the earlier termination was given.

Sec. 27. Section 46-739, Reissue Revised Statutes of Nebraska, is amended to read:

46-739 (1) A district in which a management area has been designated shall by order adopt one or more of the following controls for the management area:

(a) It may allocate the amount of ground water that may be withdrawn by ground water users;

(b) It may adopt a system of rotation for use of ground water;

(c) It may adopt well-spacing requirements more restrictive than those found in sections 46-609 and 46-651;

(d) It may require the installation of devices for measuring ground water withdrawals from water wells;

(e) It may adopt a system which requires reduction of irrigated acres pursuant to subsection (2) of section 46-740;

(f) It may limit or prevent the expansion of irrigated acres or otherwise limit or prevent increases in the consumptive use of ground water withdrawals from water wells used for irrigation or other beneficial purposes;

(g) It may require the use of best management practices;

(h) It may require the analysis of water or deep soils for fertilizer and chemical content;

(i) It may impose mandatory educational requirements designed to protect water quality or to stabilize or reduce the incidence of ground water depletion, conflicts between ground water users and surface water appropriators, disputes over interstate compacts or decrees, or difficulties fulfilling the provisions of other formal state contracts or agreements;

(j) It may require water quality monitoring and reporting of results to the district for all water wells within all or part of the management area;

(k) It may require district approval of (i) transfers of ground water off the land where the water is withdrawn or (ii) transfers of rights to use ground water that result from district allocations imposed pursuant to subdivision (1)(a) of this section or from other restrictions on use that are imposed by the district in accordance with this section. Such approval may be required whether the transfer is within the management area, from inside to outside the management area, or from outside to inside the management area, except that transfers for which permits have been obtained from the Department of Natural Resources prior to July 16, 2004, or pursuant to the Municipal and Rural Domestic Ground Water Transfers Permit Act shall not be subject to district approval pursuant to this subdivision. If the district adopts rules and regulations pursuant to this subdivision, such regulations shall require that the district deny or condition the approval of any such transfer when and to the extent such action is necessary to (A) ensure the consistency of the transfer with the purpose or purposes for which the management area was designated, (B) prevent adverse effects on other ground water users or on surface water appropriators, (C) prevent adverse effects on the state's ability to comply with an interstate compact or decree or to fulfill the provisions of any other formal state contract or agreement, and (D) otherwise protect the public interest and prevent detriment to the public welfare;

(l) It may require, when conditions so permit, that new or replacement water wells to be used for domestic or other purposes shall be constructed to such a depth that they are less likely to be affected by seasonal water level declines caused by other water wells in the same area;

(m) It may close all or a portion of the management area to the

issuance of additional permits or may condition the issuance of additional permits on compliance with other rules and regulations adopted and promulgated by the district to achieve the purpose or purposes for which the management area was designated; and

(n) It may adopt and promulgate such other reasonable rules and regulations as are necessary to carry out the purpose for which a management area was designated.

(2) In adopting, amending, or repealing any control authorized by subsection (1) of this section or sections 46-740 and 46-741, the district's considerations shall include, but not be limited to, whether it reasonably appears that such action will mitigate or eliminate the condition which led to designation of the management area or will improve the administration of the area.

(3) Upon request by the district or when any of the controls being proposed are for the purpose of integrated management of hydrologically connected ground water and surface water, the Director of Natural Resources shall review and comment on the adoption, amendment, or repeal of any authorized control in a management area. The director may hold a public hearing to consider testimony regarding the control prior to commenting on the adoption, amendment, or repeal of the control. The director shall consult with the district and fix a time, place, and date for such hearing. In reviewing and commenting on an authorized control in a management area, the director's considerations shall include, but not be limited to, those enumerated in subsection (2) of this section.

(4) If because of varying ground water uses, varying surface water uses, different irrigation distribution systems, or varying climatic, hydrologic, geologic, or soil conditions existing within a management area the uniform application throughout such area of one or more controls would fail to carry out the intent of the Nebraska Ground Water Management and Protection Act in a reasonably effective and equitable manner, the controls adopted by the district pursuant to this section may contain different provisions for different categories of ground water use or portions of the management area which differ from each other because of varying climatic, hydrologic, geologic, or soil conditions. Any differences in such provisions shall recognize and be directed toward such varying ground water uses or varying conditions. Except as otherwise provided in this section, if the district adopts different controls for different categories of ground water use, those controls shall be consistent with section 46-613 and shall, for each such category, be uniform for all portions of the area which have substantially similar climatic, hydrologic, geologic, and soil conditions.

(5) The district may establish different water allocations for different irrigation distribution systems.

(6)(a) The district may establish different provisions for different hydrologic relationships between ground water and surface water.

(b) For management areas a purpose of which is the integrated management of hydrologically connected ground water and surface water, the district may establish different provisions for water wells either permitted or constructed before the designation of a management area for integrated management of hydrologically connected ground water and surface water and for water wells either permitted or constructed on or after the designation date or any other later date or dates established by the district. Permits for construction of new wells not completed by the date of the determination of fully appropriated shall be subject to any conditions imposed by the applicable natural resources district.

(c) For a management area in a river basin or part of a river basin that is or was the subject of litigation over an interstate water compact or decree in which the State of Nebraska is a named defendant, the district may establish different provisions for restriction of water wells constructed after January 1, 2001, if such litigation was commenced before or on May 22, 2001. If such litigation is commenced after May 22, 2001, the district may establish different provisions for restriction of water wells constructed after the date on which such litigation is commenced in federal court. An appeal from a decision of the district under this subdivision shall be in accordance with the hearing procedures established in the Nebraska Ground Water Management and Protection Act.

(d) Except as otherwise authorized by law, the district shall make a replacement water well as defined in section 46-602, or as further defined in district rules and regulations, subject to the same provisions as the water well it replaces.

(7) If the district has included controls delineated in subdivision (1)(m) of this section in its management plan, but has not implemented such controls within two years after the initial public hearing on the controls,

the district shall hold a public hearing, as provided in section 46-712, regarding the controls before implementing them.

~~(8) Whenever a management area designated under section 46-712 or 46-725 or sections 46-713 to 46-719 encompasses portions of two or more districts, the responsibilities and authorities delegated in this section and sections 46-740 and 46-741 shall be exercised jointly and uniformly by agreement of the respective boards of all districts so affected. Whenever management areas designated by two or more districts adjoin each other, the districts are encouraged to exercise the responsibilities and authorities jointly and uniformly by agreement of the respective boards.~~

~~(9)~~ (8) In addition to the controls listed in subsection (1) of this section, a district in which a management area has been designated may also adopt and implement one or more of the following measures if it determines that any such measures would help the district and water users achieve the goals and objectives of the management area: (a) It may sponsor nonmandatory educational programs; and (b) it may establish and implement financial or other incentive programs. As a condition for participation in an incentive program, the district may require water users or landowners to enter into and perform such agreements or covenants concerning the use of land or water as are necessary to produce the benefits for which the incentive program is established.

Sec. 28. Section 46-740, Reissue Revised Statutes of Nebraska, is amended to read:

46-740 (1) If allocation is adopted for use of ground water for irrigation purposes in a management area, the permissible withdrawal of ground water shall be allocated equally per irrigated acre except as permitted by subsections (4) through (6) of section 46-739. Such allocation shall specify the total number of acre-inches that are allocated per irrigated acre per year, except that the district may allow a ground water user to average his or her allocation over any reasonable period of time. A ground water user may use his or her allocation on all or any part of the irrigated acres to which the allocation applies or in any other manner approved by the district.

(2) Except as permitted pursuant to subsections (4) through (6) of section 46-739, if annual rotation or reduction of irrigated acres is adopted for use of ground water for irrigation purposes in a management area, the nonuse of irrigated acres shall be a uniform percentage reduction of each landowner's irrigated acres within the management area or a subarea of the management area. Such uniform reduction may be adjusted for each landowner based upon crops grown on his or her land to reflect the varying consumptive requirements between crops.

(3) Unless an integrated management plan, a rule, or an order is established, adopted, or issued prior to November 1, 2005, no integrated management plan, rule, or order shall limit the use of ground water by a municipality, within an area determined by the Department of Natural Resources to be fully appropriated pursuant to section 46-714 or designated as overappropriated pursuant to section 46-713, until January 1, 2026, except that:

(a) Any allocations to a municipality that have been made as of November 1, 2005, shall remain in full force and effect unless changed by the appropriate natural resources district;

(b)(i) For any municipality that has not received an allocation as of November 1, 2005, the minimum annual allocation may be the greater of either the amount of ground water authorized by a permit issued pursuant to the Municipal and Rural Domestic Ground Water Transfers Permit Act or the governmental, commercial, and industrial uses of the municipality plus a per capita allowance. Water for commercial and industrial uses may be limited as specified in subdivision (b)(iii) of this subsection.

(ii) The per capita allowance shall be based on the location of the municipality, increasing in equal increments from east to west, and shall not be less than two hundred gallons per person per day at 95 degrees, 19 minutes, 00 seconds longitude and not less than two hundred fifty gallons per person per day at 104 degrees, 04 minutes, 00 seconds longitude. Persons served by a municipality outside of its corporate limits shall be considered part of the municipality's population if such service begins prior to January 1, 2026.

(iii) Prior to January 1, 2026, any new or expanded single commercial or single industrial development served by any municipality within the fully appropriated or overappropriated area which, after the operative date of this section, commences water use resulting in the consumptive use of water in amounts greater than twenty-five million gallons annually may be subject to controls adopted pursuant to section 46-715;

(c) Prior to January 1, 2026, increases in the consumptive use of water by a municipality that result in a decrease in streamflow shall be

addressed by the integrated management plan pursuant to controls or incentive programs adopted pursuant to section 46-715 and shall not affect the municipal allocations outlined in subdivisions (3) (a) and (b) of this section. Any permanent reduction in consumptive use of water associated with municipal growth, including governmental, industrial, and commercial growth, during the period between the operative date of this section and January 1, 2026, shall accrue to the benefit of the natural resources district within which such municipality is located; and

(d) To qualify for the exemption specified in subsection (3) of this section, any city of the metropolitan class, city of the primary class, city of the first class, or city of the second class shall file a conservation plan with the natural resources district, if required by the integrated management plan. Villages and other municipalities smaller than a city of the second class shall not be required to submit a conservation plan to qualify for such exemption.

(4) On and after January 1, 2026, the base amount for an annual allocation to a municipality shall be determined as the greater of either (a) the amount of water authorized by a permit issued pursuant to the Municipal and Rural Domestic Ground Water Transfers Permit Act or (b) the greatest annual use prior to January 1, 2026, for uses specified in subdivision (3) (b) of this section plus the per capita allowance described in subdivision (3) (b) (ii) of this section. On and after January 1, 2026, increases in the consumptive use of water by a municipality that result in a decrease in streamflow shall be addressed by the integrated management plan pursuant to controls or incentive programs adopted pursuant to section 46-715. Each municipality may be subject to controls adopted pursuant to such section for amounts in excess of the allocations.

(5) Unless an integrated management plan, rule, or order is established, adopted, or issued prior to November 1, 2005, no integrated management plan, rule, or order shall limit the use of ground water by a nonmunicipal commercial or industrial water user within an area determined by the department to be fully appropriated pursuant to section 46-714 or designated as overappropriated pursuant to section 46-713, until January 1, 2026, except that:

(a) Prior to January 1, 2026, the minimum annual allocation for a nonmunicipal commercial or industrial user shall be the greater of either (i) the amount specified in a permit issued pursuant to the Industrial Ground Water Regulatory Act or (ii) the amount necessary to achieve the commercial or industrial use, including all new or expanded uses that consume less than twenty-five million gallons annually. Any increases in the consumptive use of water by a nonmunicipal commercial or industrial water user that result in a decrease in streamflow shall be addressed by the integrated management plan pursuant to controls or incentive programs adopted pursuant to section 46-715;

(b) Prior to January 1, 2026, any new or expanded single commercial or industrial development served by a nonmunicipal well within an area determined by the department to be fully appropriated pursuant to section 46-714 or designated as overappropriated pursuant to section 46-713 which, after the operative date of this section, commences water use resulting in the consumptive use of water in amounts greater than twenty-five million gallons annually may be subject to controls adopted pursuant to section 46-715. This subdivision does not apply to a water user described in this subdivision that is regulated by the Industrial Ground Water Regulatory Act and the United States Nuclear Regulatory Commission;

(c) On and after January 1, 2026, the base amount for an annual allocation to a nonmunicipal commercial or industrial user within an area determined by the department to be fully appropriated pursuant to section 46-714 or designated as overappropriated pursuant to section 46-713 shall be the amount specified in subdivision (5) (a) or (b) of this section;

(d) On and after January 1, 2026, increases in the consumptive use of water by a nonmunicipal commercial or industrial water user that result in a decrease in streamflow shall be addressed by the integrated management plan pursuant to controls or incentive programs adopted pursuant to section 46-715; and

(e) Any reduction in consumptive use associated with new nonmunicipal industrial or commercial uses of less than twenty-five million gallons, during the period between the operative date of this section and January 1, 2026, shall accrue to the benefit of the natural resources district within which such nonmunicipal industrial or commercial user is located.

Sec. 29. Section 61-205, Reissue Revised Statutes of Nebraska, is amended to read:

61-205 The Department of Natural Resources shall exercise the powers and perform the duties assigned to the Department of Water Resources prior to

July 1, 2000. The Department of Natural Resources shall exercise the powers and perform the duties assigned to the Nebraska Natural Resources Commission prior to July 1, 2000, except as otherwise specifically provided.

The Director of Natural Resources and his or her duly authorized assistants shall have access at all reasonable times to all dams, reservoirs, hydroelectric plants, water measuring devices, and headgates, and other devices for diverting water, for the purpose of performing the duties assigned to the department.

Sec. 30. Section 77-3442, Revised Statutes Supplement, 2005, is amended to read:

77-3442 (1) Property tax levies for the support of local governments for fiscal years beginning on or after July 1, 1998, shall be limited to the amounts set forth in this section except as provided in section 77-3444.

(2)(a) Except as provided in subdivision (2)(b) of this section, school districts and multiple-district school systems may levy a maximum levy of (i) one dollar and five cents per one hundred dollars of taxable valuation of property subject to the levy for fiscal years 2003-04 through 2007-08 and (ii) one dollar per one hundred dollars of taxable valuation of property subject to the levy for all fiscal years except fiscal years 2003-04 through 2007-08. Excluded from this limitation are amounts levied to pay for sums agreed to be paid by a school district to certificated employees in exchange for a voluntary termination of employment and amounts levied to pay for special building funds and sinking funds established for projects commenced prior to April 1, 1996, for construction, expansion, or alteration of school district buildings. For purposes of this subsection, commenced means any action taken by the school board on the record which commits the board to expend district funds in planning, constructing, or carrying out the project.

(b) Federal aid school districts may exceed the maximum levy prescribed by subdivision (2)(a) of this section only to the extent necessary to qualify to receive federal aid pursuant to Title VIII of Public Law 103-382, as such title existed on September 1, 2001. For purposes of this subdivision, federal aid school district means any school district which receives ten percent or more of the revenue for its general fund budget from federal government sources pursuant to Title VIII of Public Law 103-382, as such title existed on September 1, 2001.

(c) For school fiscal year 2002-03 through school fiscal year 2007-08, school districts and multiple-district school systems may, upon a three-fourths majority vote of the school board of the school district, the board of the unified system, or the school board of the high school district of the multiple-district school system that is not a unified system, exceed the maximum levy prescribed by subdivision (2)(a) of this section in an amount equal to the net difference between the amount of state aid that would have been provided under the Tax Equity and Educational Opportunities Support Act without the temporary aid adjustment factor and if subdivision (3) of section 79-1007.02 and subsections (2) and (5) of section 79-1008.01 had applied for the ensuing school fiscal year for the school district or multiple-district school system and the amount provided with the temporary aid adjustment factor and if subdivision (4) of section 79-1007.02 and subsections (3) and (6) of section 79-1008.01 had applied. The State Department of Education shall certify to the school districts and multiple-district school systems the amount by which the maximum levy may be exceeded for the next school fiscal year pursuant to subdivision (2)(c) of this section on or before February 15 for school fiscal years 2004-05 through 2007-08.

(3) Community colleges may levy a maximum levy on each one hundred dollars of taxable property subject to the levy of seven cents, plus amounts allowed under subsection (7) of section 85-1536.01, except that any community college whose valuation per reported aid equivalent student as defined in section 85-1503 was less than eighty-two percent of the average valuation per statewide reimbursable reported aid equivalent total as defined in section 85-1503 for all community colleges for fiscal year 1997-98 may levy up to an additional one-half cent for each of fiscal years 2005-06 and 2006-07 upon a three-fourths majority vote of the board.

(4) Natural resources districts may levy a maximum levy of four and one-half cents per one hundred dollars of taxable valuation of property subject to the levy. Natural resources districts shall also have the power and authority to levy a tax equal to the dollar amount by which their restricted funds budgeted to administer and implement ground water management activities and integrated management activities under the Nebraska Ground Water Management and Protection Act exceed their restricted funds budgeted to administer and implement ground water management activities and integrated management activities for FY2003-04, not to exceed one cent on each one hundred dollars of taxable valuation annually on all of the taxable property

within the district. In addition, natural resources districts located in a river basin, subbasin, or reach that has been determined to be fully appropriated pursuant to section 46-714 or designated as overappropriated pursuant to section 46-713 by the Department of Natural Resources shall also have the power and authority to levy a tax equal to the dollar amount by which their restricted funds budgeted to administer and implement ground water management activities and integrated management activities under the Nebraska Ground Water Management and Protection Act exceed their restricted funds budgeted to administer and implement ground water management activities and integrated management activities for FY2005-06, not to exceed three cents on each one hundred dollars of taxable valuation on all of the taxable property within the district for fiscal year 2006-07 and not to exceed two cents on each one hundred dollars of taxable valuation annually on all of the taxable property within the district for fiscal years 2007-08 and 2008-09.

(5) Educational service units may levy a maximum levy of one and one-half cents per one hundred dollars of taxable valuation of property subject to the levy.

(6) (a) Incorporated cities and villages which are not within the boundaries of a municipal county may levy a maximum levy of forty-five cents per one hundred dollars of taxable valuation of property subject to the levy plus an additional five cents per one hundred dollars of taxable valuation to provide financing for the municipality's share of revenue required under an agreement or agreements executed pursuant to the Interlocal Cooperation Act or the Joint Public Agency Act. The maximum levy shall include amounts levied to pay for sums to support a library pursuant to section 51-201, museum pursuant to section 51-501, visiting community nurse, home health nurse, or home health agency pursuant to section 71-1637, or statue, memorial, or monument pursuant to section 80-202.

(b) Incorporated cities and villages which are within the boundaries of a municipal county may levy a maximum levy of ninety cents per one hundred dollars of taxable valuation of property subject to the levy. The maximum levy shall include amounts paid to a municipal county for county services, amounts levied to pay for sums to support a library pursuant to section 51-201, a museum pursuant to section 51-501, a visiting community nurse, home health nurse, or home health agency pursuant to section 71-1637, or a statue, memorial, or monument pursuant to section 80-202.

(7) Sanitary and improvement districts which have been in existence for more than five years may levy a maximum levy of forty cents per one hundred dollars of taxable valuation of property subject to the levy, and sanitary and improvement districts which have been in existence for five years or less shall not have a maximum levy. Unconsolidated sanitary and improvement districts which have been in existence for more than five years and are located in a municipal county may levy a maximum of eighty-five cents per one hundred dollars of taxable valuation of property subject to the levy.

(8) Counties may levy or authorize a maximum levy of fifty cents per one hundred dollars of taxable valuation of property subject to the levy, except that five cents per one hundred dollars of taxable valuation of property subject to the levy may only be levied to provide financing for the county's share of revenue required under an agreement or agreements executed pursuant to the Interlocal Cooperation Act or the Joint Public Agency Act. The maximum levy shall include amounts levied to pay for sums to support a library pursuant to section 51-201 or museum pursuant to section 51-501. The county may allocate up to fifteen cents of its authority to other political subdivisions subject to allocation of property tax authority under subsection (1) of section 77-3443 and not specifically covered in this section to levy taxes as authorized by law which do not collectively exceed fifteen cents per one hundred dollars of taxable valuation on any parcel or item of taxable property. The county may allocate to one or more other political subdivisions subject to allocation of property tax authority by the county under subsection (1) of section 77-3443 some or all of the county's five cents per one hundred dollars of valuation authorized for support of an agreement or agreements to be levied by the political subdivision for the purpose of supporting that political subdivision's share of revenue required under an agreement or agreements executed pursuant to the Interlocal Cooperation Act or the Joint Public Agency Act. If an allocation by a county would cause another county to exceed its levy authority under this section, the second county may exceed the levy authority in order to levy the amount allocated.

(9) Municipal counties may levy or authorize a maximum levy of one dollar per one hundred dollars of taxable valuation of property subject to the levy. The municipal county may allocate levy authority to any political subdivision or entity subject to allocation under section 77-3443.

(10) Property tax levies for judgments, except judgments or orders

from the Commission of Industrial Relations, obtained against a political subdivision which require or obligate a political subdivision to pay such judgment, to the extent such judgment is not paid by liability insurance coverage of a political subdivision, for preexisting lease-purchase contracts approved prior to July 1, 1998, for bonded indebtedness approved according to law and secured by a levy on property, and for payments by a public airport to retire interest-free loans from the Department of Aeronautics in lieu of bonded indebtedness at a lower cost to the public airport are not included in the levy limits established by this section.

(11) The limitations on tax levies provided in this section are to include all other general or special levies provided by law. Notwithstanding other provisions of law, the only exceptions to the limits in this section are those provided by or authorized by sections 77-3442 to 77-3444.

(12) Tax levies in excess of the limitations in this section shall be considered unauthorized levies under section 77-1606 unless approved under section 77-3444.

(13) For purposes of sections 77-3442 to 77-3444, political subdivision means a political subdivision of this state and a county agricultural society.

Sec. 31. Sections 4, 30, 31, 32, and 34 of this act become operative on their effective date. The other sections of this act become operative three calendar months after adjournment of this legislative session.

Sec. 32. Original section 2-3225, Revised Statutes Cumulative Supplement, 2004, and section 77-3442, Revised Statutes Supplement, 2005, are repealed.

Sec. 33. Original sections 46-229.02, 46-229.03, 46-229.04, 46-290, 46-291, 46-294.01, 46-2,112, 46-2,136, 46-655.01, 46-683, 46-691.03, 46-701, 46-706, 46-712, 46-713, 46-714, 46-715, 46-719, 46-739, 46-740, and 61-205, Reissue Revised Statutes of Nebraska, sections 2-945.01, 2-1588, and 2-3240, Revised Statutes Cumulative Supplement, 2004, and section 46-602, Reissue Revised Statutes of Nebraska, as amended by section 2, Legislative Bill 508, Ninety-ninth Legislature, Second Session, 2006, are repealed.

Sec. 34. Since an emergency exists, this act takes effect when passed and approved according to law.
