

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE  
Transcriber's Office  
FLOOR DEBATE

March 22, 2006 LB 915

Licensure; and it incorporates a definition of "law enforcement agency" found in Section 81-1401. The definition of "contaminated property" is revised to make clear that the definition only includes the enclosed areas of the property, and only those portions of an enclosed area that have been contaminated by substances from a clandestine lab, drug lab. There will be a following amendment to clarify this intent even further. The committee amendment require the law enforcement agency that discovers the clandestine lab to report the location of the lab to the Nebraska State Patrol within 30 days after making the discovery. Contents of the report are prescribed in the amendment. As soon as practical, the law enforcement agency must also provide the Nebraska State Patrol with a complete list of the meth-related chemicals found at or removed from the location of the lab. The Nebraska State Patrol is required to forward a copy of the report and a list to the Department of Health and Human Services, Regulation and Licensure, the Department of Environmental Quality, the municipality or county where the lab was located, and the director of the local public health department serving that municipality or county. The amendment requires the public health department serving the municipality or county where the clandestine lab has been discovered to monitor the rehabilitation of any contaminated property at that location, according to standards and procedures developed by the department in rules and regulations. The department is required to develop standards and procedures no later than July 15 of 2007. The department, upon request, is permitted to approve other standards and procedures that are as stringent or more stringent than those established by the department. The amendment permits a local public health department to charge and collect fees from the owner or co-owners of the contaminated property, to cover the cost associated with the monitoring of the rehabilitation of the property. The local public health department may contact with other local public health departments and other appropriate entities to assist in monitoring the rehabilitation. The amendment requires the local public health department to release the property for human habitation and use, once the rehabilitation of the property has been completed. The amendment prohibits the owner or owners of the contaminated property from permitting the human habitation or use of the
