Transcriber's Office
FLOOR DEBATE

March 28, 2006

LB 1148

the receipt of these...of those things, the school, the student's parents or guardian must develop a asthma or anaphylaxis medical management plan for the student for the current school year. The plan must: (a) identify the healthcare services the student may receive at the school relating to their asthma or anaphylaxis condition; (b) evaluate the student's understanding of and ability to self-manage their asthma or anaphylaxis condition; (c) permit regular monitoring of the student's self-management of their asthma or anaphylaxis condition by an appropriately credentialed healthcare professional; (d) include the name, purpose, and dosage of the prescription for the asthma or anaphylaxis medical...medication prescribed for the student; and (e) procedures for storing and access to backup supplies of such prescription asthma or anaphylaxis medication; and (f) be signed by the student's parents or guardian and a licensed healthcare provider responsible for the treatment of the student's asthma or anaphylaxis condition. The school may consult with a registered nurse or other healthcare professionals employed by the school during the development of the plan. The plan and the signed statement provided by the parent or guardian must be kept on file at the school where the student is enrolled. And pursuant to any asthma or anaphylaxis medical management plan, a student with asthma or anaphylaxis will be permitted to self-manage their asthma or anaphylaxis condition in a classroom or any other part of the school or school grounds during any school-related activity or in any private location specified in the plan. The student for whom an asthma or anaphylaxis medication management plan has been developed must promptly notify the school, school nurse, nurse designee or any other designated adult at the school when he or she has self-administered prescription asthma or anaphylaxis medication pursuant to the plan. If a student for whom an asthma or anaphylaxis medication management plan has been developed uses his or her prescription asthma or anaphylaxis medication other than as prescribed, he or she may be subject to disciplinary action by the school, except that such disciplinary action may not include a limitation or restriction on the student's access to such medication. The school must promptly notify the parent or guardian of any disciplinary action imposed, and if a student for whom an asthma or anaphylaxis medical management plan has
